

Paul and Mary Miyamasu

What a pleasure it was to talk with Paul and Mary. This interesting and Science Applications International Corporation, SAIC, and Computer happy couple will be an asset to P.C. For 30 years, they have lived near the Williamsburg Historical area and loved walking to events. They have just recently moved to P.C.

Both were born in Hawaii of Japanese-American parents and a rich background. Both are graduates of the U. of Hawaii and they have three children. Paul's Army career as an infantry officer took him to many places – the western part of Germany, Ft. Ord, CA, Ft. Lewis, WA, and several other stateside posts including Hawaii. Paul also served in Korea and Vietnam. After retiring, he worked for Sciences Corporation, CSC, in training-development related projects.

Mary has always been busy in the Bruton Parish church, knitting prayer shawls, office volunteer and other church committees, as well as lots of volunteer work during their military career. At age 51, she decided that she needed to "go to work." She looked at several great opportunities and settled on real estate, representing several builders in various communities. She was excellent at it and loved it. After 20 years, she retired at the age of 71.

When asked about hobbies, they both love to travel and have traveled extensively. Paul used to like golfing until a shoulder injury became a problem. He loves to fish. He taught his grandchildren to fish, but they also learned how to clean and gut the fish they caught. Ugh! Mary wonders if that helped them to like fish or NOT! One lasting thought for you to ponder: both of these fantastic people learned to snow ski at age 60! WOW.
