Standard NBME Web-Based Testing Requirements

The standard NBME web-based testing requirements outlined below apply to exams delivered over both wired and wireless networks. Examinees may take a web-based exam on either Macs or PCs. Any combination of fixed desktops, institutional laptops, or examinee personal laptops may be used for exam delivery.

Hardware	 Windows 7, Windows 8, Windows 10
naruware	 Mac OS v10.9, v10.10, v10.11, v10.12, v10.13
	 Mac OS V10.9, V10.10, V10.11, V10.12, V10.13 1 GHz processor or higher
	 137 or larger color monitor recommended (Desktops)
	 17 of larger color monitor recommended (Desktops) 13" or larger color monitor recommended (Laptops)
	A minimum screen resolution of 1024 x 768
	32-bit color setting enabled
	 Turn off Windows updates or virus scanner updates to
	avoid interruptions during the exam.
	 Virtual machines and applications are not allowed.
	 iPads/tablets are not allowed.
Browser	Microsoft Internet Explorer 9, 10, 11
	Safari 7 or higher
	Google Chrome 61 or higher
	Mozilla Firefox 54 or higher
Browser Settings	JavaScript, CSS, Cookies and Pop-ups all enabled
	 If possible, disable toolbars, and Adware/Spyware
	programs to prevent slowness.
Internet/Network Bandwidth	 Broadband (DSL, Cable or T1)
	 256Kbps or higher per workstation
Network Security	Some level of encryption must be in place for wireless
	networks while the exam is in progress. SSL can be
	supplemented with another security protocol, such as but
	not limited to WEP, WPA or WPA2.
Secure Browser	A Secure Browser is required to administer an NBME web-
	based exam; this application "locks down" the computer
	and prevents examinees from accessing other software applications during the exam. The Secure Browser will also
	detect any programs running on the examinee's computer
	that could compromise exam content.
	that could compromise exam content.
	The Secure Browser application does not require
	configuration or administrator rights to install and is
	downloaded on test day when the examinee URL is
	provided by the Chief Proctor.

Workstation Certification for Institution- owned Computers*	The NBME provides a utility that checks the computer for web-based testing compatibility and launches a sample test. This utility must be run on each computer in the testing room prior to test day. Fourteen days prior to the test date, you will receive an email with a URL, a unique ticket number and instructions to run the Workstation Certification utility. Do not forward this email to
NA/aulatation Contification for Francisco	examinees – it is for institutional use only.
Workstation Certification for Examinee-owne Laptops	Examinees with personal laptops are required to run a separate Workstation Certification check. Prior to test day, forward the URL and Workstation Certification instructions from the 'Prior to Test Day' section of the Chief Proctor's Manual to examinees. Do not send examinees the unique ticket number used for the institutional version of the utility.
	Examinees with personal laptops should also be advised to arrive early to re-run Workstation Certification to detect any problems with the local firewall.
Additional Computers	Extra desktop/laptop computers should be available to replace computers that may malfunction during the test session. These spares should be enabled for wired and wireless LAN use.

 $[\]hbox{\bf * Please review the Chief Proctor Instructions for additional details regarding Workstation Certification}.$
