Did You Know?

The company began in 1972 constructing dams for ranchers and farmers. With the expansion of the oil and gas industry in the Williston Basin, JMAC Resources began constructing oil locations and lease roads for oil exploration companies.

Since that time, JMAC Resources has remained in the oil exploration market and has seen growth in other areas including highways, dams, landfills, lagoons, mine development, mine reclamation and environmental projects.

Did You Know?

JMAC Resources affiliates are **IHD Environmental**, who provide environmentally sound treatment and disposal of drilling and production liquid and solid waste, and **West Dakota Water** an oilfield water resources contractor specializing in fresh water sourcing, transportation, and conveyance for well completions and production maintenance.
