Moving into a position of a manager from a teacher means meeting new challenges, taking on new responsibilities, and mastering new skills. There are many rewards that come from this evolution. As well, in our field, ECE practitioners are not necessarily taught the skills to supervise and guide staff as a manager. This workshop will be an interactive workshop with a panel of six managers with varying years of experience as a teacher, and a manager who moved from the classroom to the office as director of child development centers.

<b>9. Fun and Easy Ways to Incorporate “Math Talk”</b>	<b>English</b>
<b>Room:</b> to be determined	
<b>Interest Area:</b> Theory & Practice, STEM	
<b>For:</b> Teachers & Administrators	
<b>Level:</b> All	
<b>Presenter:</b> Teresa Gonczy, Ed.M, Harvard Graduate School of Education Early math skills can help children throughout their later schooling, but we don't want to bring worksheets and flashcards into our early childhood classrooms. Instead research shows that early 'math talk', or teachers using math language during play and class activities, can support math readiness for young children (Klibanoff, Levine, Huttenlocher, Vasilyeva, & Hedges, 2006). Math is all around us, and math talk is more than just counting. We will learn about different types of 'math talk' that we can use in different areas of our classrooms and during different routines and activities. We'll also recognize how some of the language we already use with our kids is actually 'math talk' that is helping the kids to build their math skills. We'll discuss how we can vary our math talk based on our children's ages and ability levels.

And of course, the pay for teachers is inadequate.
