

Genesee County B.E.A. provides Career Opportunities

The Business Education Alliance (BEA) is an organization whose mission is to foster a partnership between business and education, and to assist students in preparing for the world of work.

Housed at the Genesee County Chamber of Commerce, the BEA creates and implements programs that are designed to create a stronger workforce for businesses in Genesee County and educate our youth on the various pathways available to them.

Programs such as Junior Achievement, business tours for students and teachers, job shadow opportunities, mock interviews, career exploration camps, career fairs and classroom speakers expose our young people to a variety of careers and workforce experience. This summer the BEA hosted 5 career exploration camps for 100 students.

Registered campers experienced careers from culinary arts to animal science, to construction and medicine. These camps are subsidized through donations, sponsorships and volunteerism to keep them affordable for our students and their families. Each camp provided hands-on training and amazing experiences for them in their selected career.

The BEA is an organization that relies upon the support of the business community and the local schools to fund its programming. Local businesses, companies and organizations are encouraged to get involved in leading our next generation and providing them the tools needed for success.

If you are interested in becoming more involved visit our website at www.beagenesee.com or contact BEA Director Karyn Winters at 343-7440 or kwinters@geneseeNY.com.
