- worked on this problem for years. Eventually, this city, and have not made broad headway," Madison School Superintendent Art Rainwater said.

Rainwater added that it comes down to Northwestern Uni-

versity in Evanston, Ill., next week to make a presentation at a meeting of the American Educational Research Association. He said, "This is a major problem for schools that are trying to make broad headway," Madison said.

"This group believes that since we have a problem in this city, we need to work on it together," she added. "This is going to be an important part of the session."

Rainwater said that it is important for schools to understand that they are not alone in facing this problem. "There are other schools across the country that are trying to solve this problem," Rainwater said.

The community's leadership believes that a solution to this problem requires a collective effort. "We need to work together on this problem," Rainwater said.

The Madison School District is working with Northwestern University to develop a new approach to solving the problem of the racial achievement gap. "We are excited about the opportunity to work with Northwestern University on this problem," Rainwater said.
