

PROJECT TITLE: Fiscal Year 2018 Sewer Main Cleaning and Inspection Project

PROJECT OVERVIEW:

The City has hired a contractor, Performance Pipeline Technologies, to clean and inspect wastewater collection system (sewer) pipes in the Lower Riviera neighborhood starting October 30, 2017.

During pipeline inspections, the City's contractor will be using a hydro-vacuum cleaning truck, a Closed Circuit Television Inspection van, and other equipment to complete their work.

In general, work will be conducted Monday through Friday from 7:00 a.m. to 5:00 p.m. For some locations, work may be performed outside of those hours to avoid impacts to traffic on busy streets. Businesses and residents near each inspection location will receive 72-hour notice prior to the start of the inspection. Short-term parking restrictions may be required.

PROJECT BENEFITS:

The purpose of the project is to inspect the condition of the City's wastewater collection system pipes, identify areas requiring maintenance or repair, and ensure reliability of the system. In addition, the video captured by the Contractor will help the City assess the condition of the private sewer lateral connections (wyes) and identify defects that could lead to future private or public sewer overflows.

QUICK FACTS

Location: Lower Riviera Neighborhood

Schedule: October 30, 2017 through January 2018

Total Project Cost: \$84,673
