## Call Script

“Senator \_\_\_\_\_, my name is \_\_\_\_\_, and I am calling to thank you for supporting Senate Bill 3 that puts Texas families and students first by establishing Education Savings Accounts. Thank you for championing school choice this Legislative Session. The people of Texas and parents across the state appreciate you.”

## About Education Savings Accounts

Families in Texas deserve the freedom to choose the best educational setting for their child. They deserve school choice.

Thirty states have enacted a private school choice program. Texas is not one of them, but elected leaders are working to change that this Legislative Session by establishing Education Savings Accounts for Texas families.

ESAs are an innovative option to allow parents to choose the best educational environment for their child. ESAs give parents the freedom to withdraw their children from public school and receive significant resources deposited into government-authorized savings accounts to defray the costs of educational expenses. This will help parents pay for private school tuition, education curriculum, online learning, tutors and specialized therapies. States report high parental satisfaction from ESAs programs.
