

I am currently Chief Medical Information Officer (CMIO) of the University of Michigan Health System (Michigan Medicine). I am also a Clinical Associate Professor of Pediatric Cardiology at the University of Michigan Medical School with an area of focus in pediatric cardiac critical care. In my role as CMIO, I drive Michigan's health information technology strategy and oversee its operational deployment across a landscape of approximately 4,000 physicians. While my background is in healthcare, healthcare administration, and the application of computers in medicine, I also have had a significant and increasing involvement with figure skating and with the AAFSC over the past 6 years.

My children Leela (11) and Jay (8) are both avid figure skaters competing for AAFSC, and my wife Stacey has logged hundreds of volunteer hours, most notably making many of the costumes for Melody on Ice each year. I would like to join the Board as a way of giving back to a fantastic club that has given and continues to give my children so many tremendous opportunities. I am committed to helping AAFSC realize its mission and vision to continue to encourage and develop the sport of figure skating (including basic skills, freestyle, synchro, pairs, dance, and adult) in the community in a safe, supportive and fun environment. As a board member, I would promise to consider each member's input carefully and fairly, to cultivate and improve relationships with our sponsors and advertisers, and to promote and enhance communication with the public.

Thank you for your consideration,

**Ranjit Aiyagari, MD FACC**  
**CMIO, Michigan Medicine & Associate Professor, Pediatric Cardiology**
