

HCCI Essential Elements of Home-Based Primary Care™ Sample Workshop Agenda

GOALS AND LEARNING OBJECTIVES

The three-part HCCI Essential Elements of Home-Based Primary Care™ program is designed to enhance learners' knowledge, competence, and performance in providing optimal home-based primary care – based on the latest thinking and experience from national experts – from both a clinical and practice management perspective. The first part of the program (classroom workshop) features case-based sessions focusing on clinical and economic factors unique to home-based primary care, including patient assessment; medication management, infection control, coding and billing, staffing and reimbursement models.

Upon completion of the classroom workshop, learners will:

- Describe the role of HBPC in various contexts, including Population Health, Public Health, and the developing systems of health care.
- Apply the American Geriatric Society's (AGS) Guiding Principles in the approach to the care of people with multi-morbidities in the home setting.
- Provide optimal patient care in a simulated home setting, and demonstrate appropriate coding and documentation for the visit.
- Examine and discuss the business models, economic drivers, and quality indicators for HBPC and their impact on care delivery.

Day 1 Sessions

(6 hours – excluding Welcome/Introductions, meals & breaks)

Welcome and Introductions (15 min)

Session 1: Foundational Principles (90 min)

Session 2: Clinical Care (170 min)

Session 3: Operations & Staff Safety (60 min)

Session 4: Cross Cultural Competence (25 min)

Session 5: Wrap Up (15 min)

Day 2 Sessions

(6 hours, excluding meals & breaks)

Session 6: Welcome Back & Day 1 Review (15 min)

Session 7: Economics of HBPC (60 min)

Session 8: Putting It All Together (180 min)

Session 9: Coding & Billing (60 min)

Session 10: Self-Care (30 min)

Session 11: Wrap Up (15 min)
