

HCCI Essential Elements of Home-Based Primary Care™

GOALS AND LEARNING OBJECTIVES

The HCCI Essential Elements of Home-Based Primary Care™ Workshop is designed to enhance learners' knowledge, competence, and performance in providing optimal home-based primary care – based on the latest thinking and experience from national experts – from both a clinical and practice management perspective. The Workshop features case-based sessions focusing on clinical and economic factors unique to home-based primary care, including patient assessment; medication management, infection control, coding and billing, staffing and reimbursement models.

Upon completion of this activity, learners will:

- Describe the role of HBPC in various contexts, including Population Health, Public Health, and the developing systems of health care.
- Apply the American Geriatric Society's (AGS) Guiding Principles in the approach to the care of people with multi-morbidities in the home setting.
- Provide optimal patient care in a simulated home setting, and demonstrate appropriate coding and documentation for the visit.
- Examine and discuss the business models, economic drivers, and quality indicators for HBPC and their impact on care delivery.

Day 1 Sessions

(6 hours – excluding Welcome/Introductions, meals & breaks)

Welcome and Introductions *(15 min)*

Session 1: Foundational Principles *(90 min)*

Session 2: Clinical Care *(170 min)*

Session 3: Operations & Staff Safety *(60 min)*

Session 4: Cross Cultural Competence *(25 min)*

Session 5: Wrap Up *(15 min)*

Day 2 Sessions

(6 hours, excluding meals & breaks)

Session 6: Welcome Back & Day 1 Review *(15 min)*

Session 7: Economics of HBPC *(60 min)*

Session 8: Putting It All Together *(180 min)*

Session 9: Coding & Billing *(60 min)*

Session 10: Self-Care *(30 min)*

Session 11: Wrap Up *(15 min)*
