

Are you interested
in research?
Do you know about
Tecfidera®?

The **MS Center at EvergreenHealth** is now enrolling for a research trial to study the possible effects of **Tecfidera®** (dimethyl fumarate) therapy on gut microbiota of patients with **Multiple Sclerosis**.

This study will also explore the influence of change in **gut bacteria** on other important aspects of MS, including disease activity and symptomatic issues such as **mood**.

Do I
qualify?

To be eligible for this study, you must:

- Have a confirmed diagnosis of relapsing form of Multiple Sclerosis
- Be at least 18 years old
- Have not taken Tecfidera® (dimethyl fumarate), Fumaderm or other fumarate containing compound
- Be able and willing to comply with the protocol requirements for this study

If you have questions or would like more information on this study, please contact the study coordinator at 425-899-5369. Find more information online at www.clinicaltrials.gov and www.evergreenhealth.com/research.
