

Welsh Built- Coral Reef Academy- Nasa Boulevard Receives KBB Award

Last week, Keep Brevard Beautiful's South Action Team presented the "We Noticed" Award to south Brevard's newest addition to childcare, the Coral Reef Academy, at 1755 W. NASA Boulevard. The KBB South Action Team has been recognizing property and business owners throughout the southern part of Brevard County for their efforts to beautify the area and environmentally improve their landscaping since the 1990's.

Welsh Construction of Melbourne, built the 12,480 s.f. school on 1.98 acres and congratulates Khaled Jarrah and Rabab Harb on this award and the completion of their second educational facility. The building designed by Dave Nagrodsky of DNA Architects, utilizes vibrant colors on the exterior of the building while Khaled and Rabab designed the inside to be a "home like environment" which is an extension of the child's family situation. The combination of these designs will result in future awards for this facility.

Welsh Construction builds/renovates schools, medical offices, retail, self-storage facilities, churches, etc. throughout the State. Questions on the construction of the project can be directed to Chris Norton, VP of Development, Welsh Construction at chris@welshci.com and 321-757-7383.
