The price statistics are derived from all types of home sales-new and existing-single family detached dwellings. Movements in sales prices should not be interpreted as changes in the cost of a standard home. Median prices can be influenced by changes in cost, as well as changes in the characteristics and size of homes sold. Due to the low sales volume in some cities or areas, median price changes may exhibit unusual fluctuation.

*Median sold data based on a twelve month period (one year period ending the last day of the statistical month/year in the first column).

Percentage appreciation shown above is based on a twelve month period. The price statistics are derived from all types of home sales-new and existing condo/townhome dwellings. Movements in sales prices should not be interpreted as changes in the cost of a standard condo. Median prices can be influenced by changes in cost, as well as changes in the characteristics and size of condos sold. Due to the low sales volume in some cities or areas, median price changes may exhibit unusual fluctuation.

*Much of the data for pending listings in December 2006 was lost due to a Multiple Listing Service program conversion. This count does not reflect an accurate number of the listings in escrow at that time, as now almost all of those listings will have sold, expired or been withdrawn.
