MATH: A SUBJECT THAT REALLY COUNTS!

Great to see you at BTS Night!

We hope you liked getting to know your child's math teacher and learning about Illustrative Mathematics. For those of you that did not make it, we also went over our department's redesigned policies for homework and retakes.

To learn more about Illustrative Mathematics, click [here](#). To review the HW & retake policies, as well as other department policies, [click here](#).

Lost and Found!

If your child has lost (or eventually DOES lose) his/her math workbook, there are a few things that can be done. There is a link to the book found on our website below the description of our current unit. Class work and practice problems (HW problems) are included. Lessons can be printed or photocopied, or the student can do work on paper, if possible. Another option is a replacement book at a cost of \$10. Checks to RUSD.

UPCOMING "STUFF"!

Math Help! Anytime — Just ask!

End of Trimester: November 3rd

Student-led Conferences: Week of November 13th

Math Club: Thursday mornings at 7:35 in Room 2! Come one, come all for challenge and enrichment!

TESTS/Quizzes/Projects:

Please check the calendars posted on the RUSDMATH.weebly.com site to get specifics for your child's grade level.

TIPS for helping your child with math!

#1 - Please check your student's iCal, grade level WEEBLY site, or GOOGLE calendar regularly, for homework assignments, project due dates and test announcements. Whether 8th graders or brand new to middle school (or somewhere in between), that ALONE will greatly help to them keep on track! Hopefully, soon they'll do it all on their own!
