

Maine Dental Hygienists' Association Presents

Pediatric Dentistry

6 hr Category 1 Continuing Education Course

Today's Pediatric Dentistry... That You Can Use in Your Office Tomorrow!

- How to be proficient in treating kids and have fun doing it!

Featuring Arnold Weiss, DDS, MScD

Course description:

This course includes information for the practicing dentist, dental hygienist and assistant to understand the rationale for treating all ages of children and to learn the appropriate techniques for obtaining the optimal behavior from toddlers through teens. Specific clinical techniques will be taught that will enable the practitioner to give standard of care treatment to these children.

Goals and Objectives:

1. Being able to complete clinical pediatric dental procedures under optimal conditions.
2. Determining the appropriate behavioral approach to an individual child.
3. Adding to and enriching procedures in the armamentarium of the dental practitioner.
4. Minimizing the dental practitioner's difficulty and stresses in dealing with children.

Arnold Weiss, DDS, MScD

Arnold Weiss, DDS, MScD has been in the practice of pediatric dentistry for over 40 years. His practice is in the top ½ percent of pediatric dental practices in the US. He is a student of business management and personal growth, which he has effectively applied to dental practice and life. His goal has been to help his team and other dental practitioners reach their potential and enjoy the practice of dentistry.

Dr. Weiss has a private pediatric dental practice in Brookline, Massachusetts, is an associate clinical instructor at Tufts in the Department of Pediatric Dentistry and is a member of the AAPD Council on Clinical Affairs having worked on the Behavior Guidance and Infant and Peri-Natal Oral Health Guidelines.
