

# Government Contracting Basics

## Getting Started in Government Contracting

The federal government spends \$500 billion in contracts every year and the law requires that 23% of these dollars be awarded to small businesses. State and Local agencies have similar objectives.

This entry-level class will help you get started!

Geared toward small businesses across any industry, this class is best suited for those with limited to no government contracting experience or those seeking a refresher on the basics.

All are welcome!
