

# Healing at the Speed of Light

## Emotional Transformation Therapy

Cutting Edge Neuro-psychotherapy  
for resolution, relief and more (21CEUs\*)

*June 2, 3 & 4, 2017*

**Level I Training: Introduction to Emotional Transformation Therapy**  
**Therapeutic Eye Movement and Quantum Processes**

Emotional Transformation Therapy® (ETT®) identifies, processes and releases neuro-physiological sources of emotional and bodily pain, trauma, and depression at unprecedented speeds. An attachment focused form of eye movement that uses precise wavelengths of light sets a new standard for eye movement in therapy. ETT® provides a new level for client safety by rapidly regulating intense emotion, yet it can also help dissociative clients feel connected again. It is simultaneously a form of moment to moment diagnosis and an effective treatment. When empirically based concepts from quantum physics and interpersonal neurobiology are used in combination, the core of emotional distress can be precisely accessed while providing attuned interpersonal support.

## **What Can ETT® and Multidimensional Eye Movement Do?**

Relief of the symptoms of the following:

❖ Acute Stress Disorder	❖ Anxiety
❖ Panic	❖ Arthritis
❖ Complex Trauma	❖ Post Traumatic Stress Disorder
❖ Shame	❖ Phobias
❖ Attention Deficit Hyperactive Disorder	❖ Depression
❖ Migraine Headaches	❖ Fibromyalgia
❖ Physical pain from injuries	❖ Chronic Fatigue Syndrome

**You will be introduced to:** Quantum Neurobiology Resonance

### **Learning Objectives:**

To recognize eleven attachment patterns and optimal interventions to enhance the interpersonal aspects of the therapeutic relationship.

To identify emotional themes found to correspond to each band wave of color.

To identify 3 ETT tools and when/how to use each in psychotherapy.

To identify 5 techniques involving multidimensional eye movement processes.
