2 Project Definition and Requirements

2.1 Overview

2.1.1 Overview of PGW

PGW is a municipally-owned utility operated by the Philadelphia Facilities Management Corporation (hereafter referred to as “PFMC”). The successful Proposer will enter into a negotiated contract with PGW by PFMC. PGW provides natural gas service to approximately 502,000 active accounts within the city of Philadelphia, using 6,000 miles of gas mains and services. PGW is the only utility currently distributing natural gas within the city of Philadelphia, and its mission is to provide safe, reliable natural gas service to the citizens of Philadelphia at a reasonable cost.

2.1.2 Background Information

PGW’s Gas Processing Department transfers liquefied natural gas to and from two (2) 25 million gallon storage tanks located at PGW’s Richmond Plant. Each tank utilizes multiple submersible LNG pumps. PGW is looking to replace one (1) pump that transfers LNG from the South storage tank through the send out lines to be used for piping cooldown, truck loading and vaporization. PGW is requesting that the new pump be controlled by a VFD (Variable Frequency Drive) in order to obtain a flow range of 500 to 2,160 gallons per minute (GPM). The new transfer pump must be equipped with a thrust equalizing mechanism.

The Richmond Plant is an active natural gas processing and distribution facility. PPE is required to be worn by all personnel authorized to enter this facility, and must be worn at all times while within the facility. All workers must wear steel-tipped boots, hard hats, safety glasses, and flame resistant clothing meeting the National Fire Protection Association (NFPA) 2112 Standard under the Tyvek PPE. All PPE must be supplied by the Successful Proposer while conducting activities at these facilities.

2.2 Services to be Provided; Scope of Work

In order to maintain reliable service and delivery of LNG, PGW Gas Processing Department is seeking proposals for the following equipment and related services.

Equipment:

- Submersible LNG Transfer Pump (specifics detailed in Attachment A)
- Variable Frequency Drive (specifics detailed in Attachment B)

Services to be Provided:

- Design and selection (subject to PGW review and approval) of a LNG pump capable of handling required flow characteristics and physical constraints listed in Attachment A.
- Perform testing of pump in LNG as described in Attachment C.
- Provide engineering services to PGW that include the following services as described in attachment D:

Philadelphia Gas Works – Request For Proposals Liquefied Natural Gas Pump and Related Engineering Services

- Surveying of existing pump.
- Design drawings of new pump, VFD and electrical components.
- Production and submission of manuals, installation procedures, pump curves and test reports.
- Supervision of the installation of the new pump at Richmond Plant Facility.

2.3 Term

The contract between PGW and the successful Proposer for the scope of work described herein shall be two (2) years, with the option to extend the contract for one (1) additional year, unless earlier terminated by PGW. PGW requires that the successful Proposer be prepared to supply the LNG pump and VFD by August 1, 2019. The service agreement work will be expected to continue for the full term of the contract.

2.4 Proposal Pricing

Each proposal shall include a lump sum price to supply the LNG pump, VFD, Testing, Engineering and Spare Parts as specified in Attachments A through D of this RFP; the lump sum price for each of these items must be identified in Attachment E. In addition, Proposers must respond with their proposed values per the last column in Attachment A and B. In attachments C and D Proposers shall respond with a “Yes” or “No” in the comply column. Copies of product specifications and literature must be included with the response to this RFP.

Each Proposer must fully complete Attachments A through E, which will be used by PGW to evaluate the submitted proposals.

2.5 Proposer/Personnel Minimum Requirements

Proposers must have experience designing, supplying and testing LNG Pumps, and the service technicians must be factory authorized to work on the equipment supplied to PGW through this RFP.

2.6 Licensing

The Proposer will be authorized to do business in the Commonwealth of Pennsylvania and comply with all pertinent state and federal requirements, codes and regulations.

If Proposer is a “business” as defined in The Philadelphia Code, Section 19-2601, Proposer must have a valid business privilege license, issued by the City of Philadelphia’s Department of Licenses and Inspections, to do business in the City of Philadelphia, prior to entering into any contract with PGW.

2.7 Information/Product

All reports, surveys, tables, charts, diagrams, design work, product recordings and other data (including electronic, audio and video) or documentation prepared or compiled by Proposer in connection with the performance of its obligations under the contract, shall be

Philadelphia Gas Works – Request For Proposals Liquefied Natural Gas Pump and Related Engineering Services

the sole and exclusive property of PGW. Proposer shall retain in its files, sufficiently detailed working papers relevant to its engagement with PGW. Proposer further agrees that its working papers will be held in the strictest confidence and will not be disclosed or otherwise made available to outside sources, except as required by law, without the written consent of PGW.

2.8 Confidentiality

Proposer must agree to keep confidential any and all information concerning the plans, operations or activities of PGW which may be divulged by PGW or ascertained by Proposer in the course of performing services under any contract with PGW. In the event Proposer is required to disclose confidential information pursuant to a subpoena, order of a court, or other legal process, Proposer shall, upon notice of such required disclosure and prior to disclosure, immediately notify PGW and allow PGW the opportunity to inspect the information subject to disclosure, and in the event such disclosure is objectionable under any standard or rule of the court, Proposer shall exhaust all legal means to prevent disclosure.

2.9 Minority Participation

PGW has established an anti-discrimination policy relating to the participation of Minority, Women, and Disabled businesses and persons (collectively, "DBEs") in contracts. The purpose of PGW's DBE policy is to provide equal opportunity for all businesses and persons and to assure that PGW funds are not used, directly or indirectly, to promote, reinforce or perpetuate discriminatory practices. Proposers must complete Attachment I (Demographic Survey), attached hereto and submit same with their proposals.

For this project, PGW has not established a goal for participation of DBEs. Each proposer must exercise its Best and Good Faith Efforts to include DBEs in its proposal. "Best and Good Faith Efforts" are those efforts, the scope, intensity and appropriateness of which are designed and performed to achieve meaningful participation of DBEs in the work described in this proposal. Proposer's desire to self-perform all of the work does not excuse proposer from its exercise of Best and Good Faith Efforts.

In furtherance of such purpose, each Proposer may employ some or all of the following methods:

- Contact DBEs that reasonably could be expected to submit a quote and are available in the OEO Directory of Certified Firms before the proposal date and notify them of the nature and scope of the work to be performed.
- Break down or combine elements of work into economically feasible units to facilitate DBE participation.

Work with trade, community, or other organizations that provide assistance in recruitment of DBEs.
