# Tee-On's software can help your club respond to the challenges of COVID-19

During this time of uncertainty, we know you are considering how best to take care of your employees and customers. Below you'll find some suggestions on ways our software can add to your club's COVID-19 response plan for the 2020 season. Of course, we strongly encourage to you check with your region's health authorities and/or governmental directives to ensure you are always following the latest guidance.

## Online Booking with Payment

**Thinking about reducing the need to handle cash?** Your course can collect online payments at the time of booking with our online booking system. Golfers can conveniently pay for tee times and power carts.

## Mobile Food and Beverage
## On-Course Delivery and Take-out

**Considering alternate ways to offer F&B to your customers?** Allow golfers to order and pay for food and beverages directly from their smartphones with our Mobile Food and Beverage software. It's fully integrated with our POS and orders can be displayed on a kitchen monitor or sent directly to your kitchen printer.
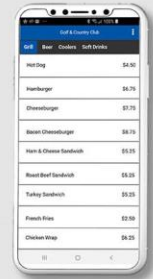

## Online Store

**Looking for ways to increase physical distancing in the proshop?** Using Tee-On's Online Store, your club can sell anything and everything online (including memberships, league passes, gift cards, game packs and inventory items).
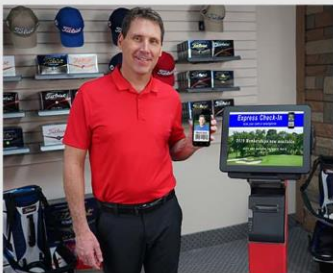

## Express Check-in

**Wondering if there's a way to reduce close contact with staff?** Club members and league players can scan themselves in using Express Check-in. This option also works for pre-paid golfers – such as those using gift cards (plastic cards or mobile) or game packs.

## Tap Payment

**Want another no-touch option for payment?** Club's using our Integrated Moneris and POS solution can benefit from using Tap Payment to help keep staff and customers safer. Customers can tap using their debit or credit card for payment.
