

# Agenda

## Tech Systems Inc - Security Symposium

### Event Summary:

Join us for a day of information sharing and networking in an open forum format and learn about relevant, timely topics impacting fellow security directors and consultants. Lunch will be provided. Earn Continuing Education Credits, rub elbows with local leaders and walk away with fresh, innovative ideas for your organization.

### Agenda:

8:00am-9:00am **\*\*Welcome & Registration/Networking\*\***

9:00am -10:00am Session One: **Security Trends Making Waves in the Board Room**

**Presented by: Wayne Smith, CISSP, CISM, CPP**

As physical and information security collide security directors play a critical role in the process. Responsible for bridging the gap between physical and information security, CSOs and security managers must accommodate the needs of IT, InfoSec and Cyber Security. This presentation comprises an overview of current security trends and solutions to the challenges we face today.

10:15am - 11:15am Session Two: **Security Risk Mitigation Techniques to Implement for Immediate Benefits**

**Presented by: Shawn Reilly, CPP, PSP, CHPA, CPTD**

An effective security strategy is based on organizational risks. By taking advantage of the following tools, several risks can be mitigated through data analysis, procedural adjustments and training:

- **Risk Assessments** direct and prioritize vulnerabilities in the protection of people, property and information of the enterprise.
- **Security Metrics Dashboards** provide security leaders and executives with relevant, timely data to make swift, informed decisions.
- **Targeted Training Programs** designed specifically for system administrators, SOC operators and security officers empower these professionals to work more efficiently and minimize the impact of security incidents when they occur.
- **Communication Strategies** provide all employees with the knowledge and skills needed to responsibly mitigate risk in their particular areas.
