

**Delaware Area Career Center
Adult Education
Nurse Aide Program**

STUDENT NAME: _____

TUBERCULOSIS TESTING

TWO-STEP MANTOUX (intradermal) is required. This involves two TB Mantoux tests given at **least** one week apart and within the last year. Read each test at 48hr. or 72 hr. after each TB intradermal injection. This must be read by a physician, nurse, or physician's assistant. **TB tine tests are not acceptable per state regulations. If the student recently received an MMR or Varicella vaccine, the TB testing must be postponed for at least 30 days from the date of the two above vaccines.**

TB #1

TB #2 (At least one week after the first TB test)
