

## Educator in the Workplace

Professional Development

June 4-6, 2018

This course is designed for DACC associate school teachers, counselors, administrators, or educational support staff. By giving educators the opportunity to explore business environments and become aware of career opportunities, they are able to incorporate workplace competencies and career readiness in the classroom/ school setting.

### How does this align?

#### Ohio's Teacher Performance Evaluation Rubric

Instructional Planning	Prior Content Knowledge/ Sequence/ Connections (Standards 1,2, & 4)	<b>Accomplished:</b> The teacher uses input and contributions of families, colleagues, and other professionals in understanding each learner's prior knowledge and supporting their development. The teacher makes meaningful and relevant connections between lesson content and other disciplines and <u>real-world experiences and careers</u> as well as prepares opportunities for students.
------------------------	---	--

### Course Goals:

**Identify connections between workplace experience and education by considering the following:**

- Identify current jobs, hiring trends & education requirements
- Learn how technology is used throughout business and industry
- Become aware of workplace skills and competencies required by employees

**Acquire resources that can be utilized in educational setting (classroom, counseling)**

- Apply business connections to usable educational outcome (lesson plan, presentation, work based learning experience, etc.)
- Develop possible relationship with business contact for future collaboration

### Registration:

[www.DelawareAreaCC.org](http://www.DelawareAreaCC.org)

Go to "About", then "Events"

Registration closes June 1, 2018

### Credit:

Participants will earn 12.5 contact hours and may also enroll in Ashland University for 1 graduate credit (at the cost of \$175).
