GLOSSARY

algae: very simple, usually small plants that grow in or near water and do not have ordinary leaves or roots.

arboreal: living in trees.

camouflage: an animal's natural coloring or form that enables it to blend in with its surroundings.

canopy: the uppermost trees or branches of the trees in a forest, forming a more or less continuous layer of foliage.

diurnal: active in the daytime.

habitat: the natural home or environment of an animal, plant or other organism.

herbivorous: feeding on plants.

mammal: a warm-blooded vertebrate animal of with hair or fur, the secretion of milk by females for the nourishment of the young and, typically, the birth of live young rather than laying eggs.

nocturnal: active in the nighttime.

Costa Rica: a country of Central America between Nicaragua and Panama and between the Caribbean Sea and the Pacific Ocean.

rainforest: a tropical woodland with an annual rainfall of at least 100 inches and marked by tall, broad-leaved trees forming a continuous canopy.
