

# Target Frames Shot Up

Jon Kitts would like to ask help in keeping target frames from being shot up by some dos and don'ts:

Do take care and **shoot in center of target frame** only. **Don't** put **larger boards** on movable **frames**.

Don't put targets within proximity to edge of movable frame 4-6" minimum distance.

**Don't use silhouette targets on movable target frames**, they are too close to edge of 4-6" from edge.

Do use **silhouette targets on range A fixed target boards** and take care to **center shoot only**

Don't do this:
