

Maybe you are seeking general knowledge about building documentation, or trying to gain more skills for your career. Could you use materials and video resources to help educate your clients? Are you without a degree, have lots of experience, but no formal credentials? A USIBD certification could be what you need to demonstrate your expertise. Whatever your reason, NOW is the time to get involved in the USIBD's Education Program!

**BUILDING DOCUMENTATION**

*The Leading Resource for the  
Building Documentation Industry*

Education

*A critical component of the USIBD mission is education and training. As a newly formed professional organization in a specialized field like building documentation, establishing that we are the "go to" venue for education and training will help to attract members and build credibility.*

# Education Committee

## ■ Training

The focus of this subcommittee will be to develop "on-the-job" training courses and programs that serve the needs of individuals who are either in the business or wanting to become qualified to pursue an employment opportunity.

## ■ Education

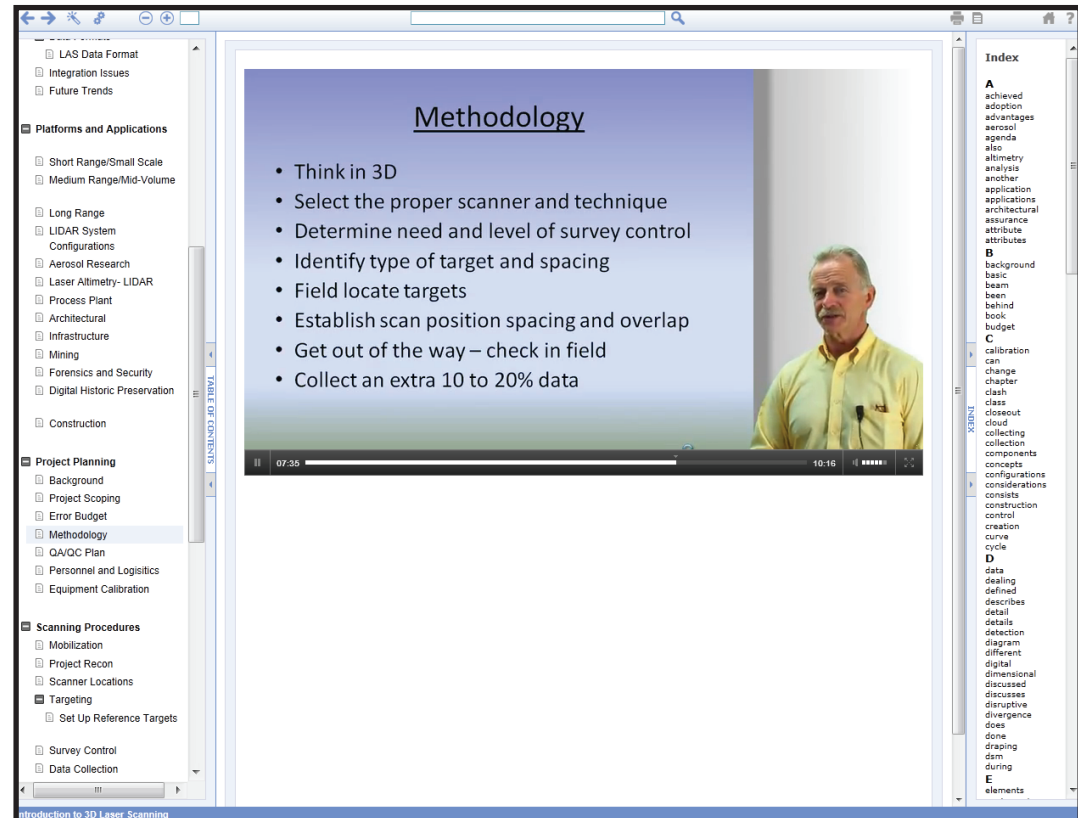

The focus of this subcommittee will be to liaison with established colleges and university programs to better prepare students to enter our profession by communicating with these programs about the skills and course work that is needed to be successful in building documentation

## ■ Certification

Within 3 to 5 years, or perhaps sooner, the USIBD would like to offer a building documentation professional certification program. This would establish a threshold level of expertise for members who are certified and create value for all involved.

## ■ Outreach

The focus of this subcommittee would be to inform and educate the public about the benefits and mission of USIBD and to seek out mutually beneficial strategic partnerships. This would include other professional organizations and business groups.

*Online video courses are being developed which will form the foundation of learning for the USIBD's training, education and certification initiatives.*
