

PRIMEFLIGHT^{UV}™ SOLUTIONS

LEVERAGING UV-C TECHNOLOGY TO SERVE THE AVIATION INDUSTRY

Integrating UV-C technology, our unique PrimeFlightUV designs are tailored to the aviation industry. UV-C lamps have shown to be effective in inactivating microorganisms such as bacteria, viruses and pathogens. This technology is trusted in medical facilities, water treatment, and the food and beverage industry today.

UNIQUE MODULAR DESIGNS GIVE FLEXIBILITY

Our patent-pending PrimeFlightUV surface disinfection designs can be used in a number of ways to keep your team members and passengers safe. With the ability to mount onto current systems, or stand alone with stationary or wheeled legs, our surface disinfection units were built to meet your changing needs. Some units have multiple size configurations, or we can build to meet your needs. This ensures our units will work across your operations. Our surface disinfection units include modules for:

- Passenger Facing Equipment Disinfection
- Conveyor Belt Operations
- Cargo Handling Operations
- Security Check-Points
- Check-in Areas
- Baggage Carousels and Baggage Handling Equipment

UV-C BENEFITS

- Effective in inactivating microorganisms such as bacteria, viruses and pathogens
- UV-C light can disinfect an entire room in less than 5 minutes and a small area in 3-5 seconds
- With an average life of 10,000 hours, the 60-watt UV lamps used in our unique designs are low maintenance
- This technology is utilized in medical facilities, water treatment, and the food and beverage industry
- Surface disinfection can give your passengers peace of mind and help you keep your team members safe, assisting in your goal to safely move clean cargo, baggage and equipment from point A to point B
- Each design features UV filter covers and curtains to keep users safe

A FULL LINE OF DISINFECTION SOLUTIONS

SURFACE DISINFECTION FROM A FULL-SERVICE PROVIDER YOU TRUST

PrimeFlight Aviation Services provides aircraft, passenger and security services for the safe and reliable operation of your aircraft and the comfort of your passengers. With extensive aircraft and facility cleaning experience, and a provider of aviation-focused cleaning supplies through subsidiary, Aviation Cleaning Supply, we understand the needs of our partners, their passengers, and the facilities we serve.

FEATURES OVERVIEW

- **Baggage Handling Equipment Disinfection:** Can be used in conjunction with your current GSE and help you meet your goal of loading clean baggage onto your aircraft
- **Escalator Disinfection:** Automated disinfection for high touch escalator railings
- **Security Bin Disinfection:** Our automated design was built to fit into existing security systems and can disinfect airport security bins
- **Security Check-Point & Carry-on Disinfection:** With a transportable frame, this unit will help you keep agents safe when screening baggage, or can be used at the gate to clean baggage before it boards the aircraft
- **Passenger Facing Equipment Disinfection:** Can be used to disinfect wheelchairs and other customer-facing equipment with its portable design
- **Aircraft Disinfection:** We have designs units that have both electrostatic spraying and UV disinfection to meet the changing needs of the industry
