

WHMIS 2015: with GHS

Join training leaders Reg and Stu as they narrate the course and provide an overview of WHMIS after its alignment with GHS.

GHS IS HERE – ARE YOU READY?

The Global Harmonized System (GHS) was adopted by Canada in 2015 and as a result WHMIS has changed. The old WHMIS is known as WHMIS 1988 and the updated WHMIS is called WHMIS 2015.

DID YOU KNOW?

- Employers need to provide WHMIS training to all workers at facilities where hazardous chemicals are used.
- Suppliers are already sending WHMIS 2015 labels and SDS documents now and your workers need to be trained to understand them.
- Your workers need to understand both the WHMIS 1988 and WHMIS 2015 systems through the transition period.

CHEMSCAPE OFFERS:

WHMIS 2015: with GHS is a comprehensive online course that covers all the essential elements of WHMIS 2015. Entertaining, interactive and engaging WHMIS 2015 addresses WHMIS from the worker's perspective.

Main topics include:

- Hazard Symbols
- Product Labels
- WHMIS Basics and Responsibilities
- Hazard Classification
- Safety Data Sheets

TRAINING FOR THE WORKPLACE

Users are asked to demonstrate the skills to search, find and open an SDS, and label using the msdsBinders system. This information allows the user to answer the 5 fundamental questions needed to work safely with a product, including:

1. What is this product?
2. What are the hazards?
3. How to work with the product safely?
4. What to do in an emergency?
5. Where to find more information?

WHMIS 2015 is authored by Chemscape under the guidance of an Industrial Hygienist who is certified with the American Board of Industrial Hygiene.
