### **MGH&FC WELCOMES NEW OB/GYN – CAREY MARTENS, D.O.**

SHELTON, Wash. – Mountain View Women's Health and Mason General Hospital are pleased to welcome board-certified obstetrician/gynecologist Carey Martens, D.O., who joined their medical and surgical staff on May 1, 2018. Prior to this Dr. Martens had a private practice in Aberdeen, WA that focused on bringing state-of-the-art, minimally-invasive gynecologic procedures and the evidence-based practice of obstetrics and gynecology to a rural area.

Dr. Martens was the 9th surgeon in the United States, and 22nd in the world, to use the revolutionary Olympus Contained Tissue Extraction System. He also developed a brand of 'compassionate, close to home care' that allowed area residents to get the best care possible, locally. For co-management of patients, Dr. Martens maintains close relationships with the University of Washington and the Franciscan Health system. His special clinical interests include minimally-invasive gynecological procedures to treat incontinence, heavy cycles, and pelvic pain. He also has an interest and experience in teaching medical students, residents and nurse midwives.

Dr. Martens and his wife, Natasha have two daughters who attend school in the area. During his free time he enjoys performance racing with his wife and traveling with his family.

MGH&FC is approved by the Joint Commission and is a licensed and accredited acute care hospital with a level four emergency trauma designation. MGH&FC now offers Virtual Care – 24/7. For more information on Virtual Care or to find a health care provider, go to [www.MasonGeneral.com](http://www.MasonGeneral.com).
