

## NOVA Open Rebasing Guide for Warhammer Age of Sigmar

Rebasing your army can be a challenge, but as Warhammer Age of Sigmar continues to grow and progress the overall community consensus is to play the game on round bases\*. Every new army is being supplied with round bases and Games Workshop is working to repackage older kits with round bases as quickly as they are able.

Unfortunately, there hasn't been 'official' word from Games Workshop about rebasing despite the community move toward this eventuality. This has caused confusion and there are many arguments for and against rebasing old models to newer round bases. We are providing this guide in order to help alleviate any questions this new standard for NOVA Open's Warhammer Age of Sigmar Grand Tournament, Doubles Event, and Narrative Event.

If you have any questions not answered here please email [customerservice@novaopen.com](mailto:customerservice@novaopen.com)

\*Please note we use the term 'round base' to mean round as well as oval bases.

### **1. What size should I rebase to if your army is on square bases?**

- a. The easiest guide is to look at Games Workshop's website to see if your model has been released with round bases. For example Chaos Knights, now called Slaves to Darkness, have been repackaged in a Start Collecting Box giving insight on the base size standard for these models.

### **2. What size should I rebase to if my army has not been repackaged?**

- a. Here is a guide in order to help you with rebasing. The guide is written looking across all models that have been repackaged and will give the most accurate conversion from the current square base to the new round base.
  - i. 20mm x 20mm (square) → 25mm (round)
  - ii. 25mm x 25mm (square) → 32mm (round)
  - iii. 25mm x 50mm (rectangle) → 75mm x 46mm/60mm x 35mm (oval)
  - iv. 40mm x 40mm (square) → 40mm (round)
  - v. 50mm x 50mm (square) → 50mm (round)
  - vi. 50mm x 75mm (rectangle) → 90mm x 52mm (oval)
  - vii. 50mm x 100mm (rectangle) → 105mm x 70mm/120mm x 92mm (oval)\*
  - viii. 150mm x 100mm (rectangle) → 170mm x 105mm (oval)

1. \*Chariots while originally on 50mmx100mm squares are an odd case as they have all been repackaged with 120mmx92mm bases to date.

### **3. Do I have to buy Games Workshop bases?**

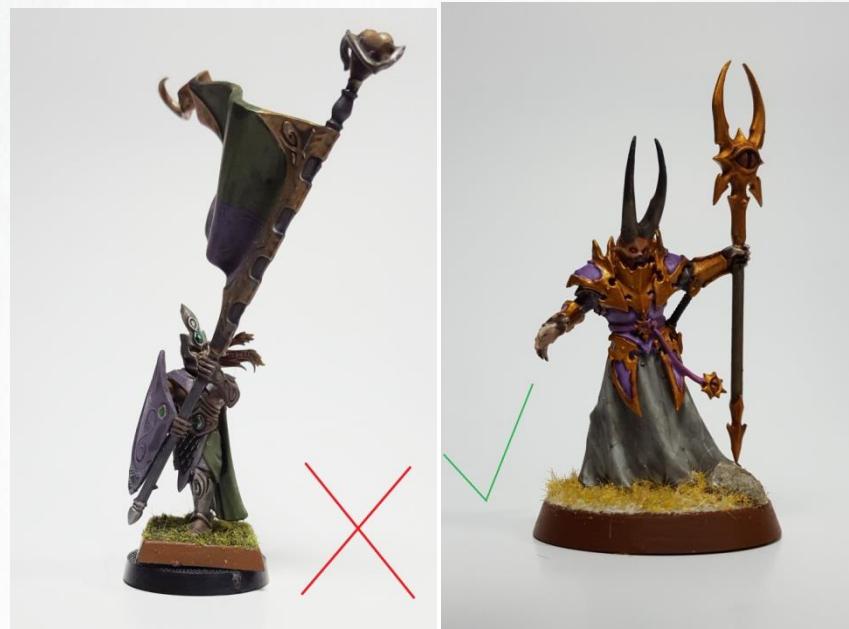

- a. No, there are many third party companies that also make bases out of Plastic, Resin, and MDF and while some might be slightly smaller or larger measurements (within 2mm difference) these will be accepted at NOVA Open Warhammer Age of Sigmar events requiring round bases.

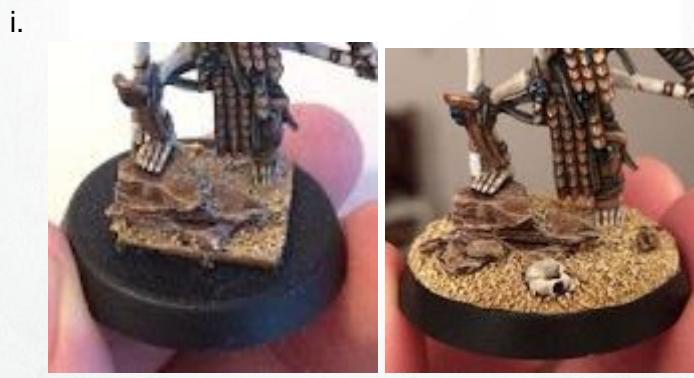

**4. Can I simply use 'Blue Tack' or stick my square base onto the appropriate size round?**

- a. This will not be an acceptable standard at the NOVA Open Warhammer Age of Sigmar events requiring round bases.
  - i. Example:

- b. While temporarily attaching your square base to a round is not acceptable it is acceptable to trim around the old square base, glue it to the new round base, but the old base cannot overlap the new. We encourage you to "build" up your basing around the trimmed square base with this method.

Before build up

After build up

- c. Base converters/adapters/extenders are acceptable, but the basing material will need to be added so the additional surface area is covered with the basing material as well.

i.

#### **5. What does it mean to be considered to be fully based?**

- a. The painted model is secured to the base which is flocked or painted to a tabletop standard.
- b. If you have any questions if your models meet the basing requirement please email [customerservice@novaopen.com](mailto:customerservice@novaopen.com)
