

Patient Education and Support Meetings

We are excited to hear that you are interested in hosting a Patient Education and Support Meeting in your local community. This is a valuable opportunity to bring patients, caregivers and supporters together to share common issues and to learn more about porphyria from an expert. Discussions often include medical explanations, information about current and emerging treatments, and an extended time for Q&A to answer specific questions. Bringing together a group facing similar issues in a social atmosphere is a meaningful and educational way to help individuals understand that they are not alone. We are here to help you coordinate your efforts.
