

Tenth Grade Summer Reading 2018-2019

At Carver, we are committed to supporting students' love of reading and learning to give them a little bit of structure to their summer in preparation for the coming school year. We view reading as a pleasure and share that pleasure with our students.

Last year you read one of these two books listed below for PE. You may choose the OTHER book or one of your choice.

- *Rudy: My Story*, an autobiography written in 2012 OR
OR *Life in Motion: An Unlikely Ballerina* by Misty Copeland
OR biography or autobiography of an inspirational athlete of your choice.
- One of the *Dummie Guides* or *How to Idiot guides* OR *Galileo's Daughter*, by Dava Sobel

Assignment for PE and English

Read EITHER *Rudy: My Story* OR *Life in Motion* by Misty Copeland OR Athlete of Choice

Assignment: Keep a journal as you read. Write about 10 strong reactions/inspirations/motivations you had while reading and explain why. We can create health by making changes in ourselves. How has the story made you think about changes you'd like to make in your own life? Be ready to share three in class.

Assignment for Physics -there are two options

Option 1:

Overview: Your task to learn a new skill and demonstrate it. A skill is something you can do, not some facts you learn, or even an interesting way of thinking about a topic like learning about music. An example of a skill would be learning to play a song on the recorder. It would not be learning music theory. Learning how to read music is a skill.

Your Job

Your job is to learn a skill you by reading a "for dummies book" or an "idiots guide" and bring something you did to share with the class during the first two days of school. You should bring what you create and be prepared to do a 5 minute presentation on what you created. It must be something you can create and not a subject area you learned. This could be any skill that you can demonstrate. This gives you practice following instructions and "Physics reading skills." It will also show me what you are interested in. I will share something new I learned over the summer too.

Grading

This is the first assignment of the year, so please do not forget to do it. Besides, what better way to get to know you and what you are interested in. I can't wait!!!

Presentation-clear, practiced and 5 min long explaining what you learned how to do and showing what you actually created using what you learned.

Skill-Must show a skill, not acquired knowledge on a topic.

Craftsmanship-the item you make should be a small enough project in scope to finish with quality. Do not start something you cannot finish. Think about quality and not quantity. KISS-Keep is Simple Silly. The project should not take more than 20 hours-although you are not limited in time. Please discuss the scope of the project with your parent if you are not sure you can finish. If you are like me and tend to take on big things you have a hard time finishing, it might be good to talk with a parent about it in that case too.

Here is a list of for *Dummies books* that might interested you-Be sure you pick something you can actually bring in and demonstrate.

Beekeeping for Dummies	Origami for Dummies
Raising chickens for Dummies	Drawing for Dummies
Minecraft for Dummies (show what you built?)	
Urban Gardening for Dummies	Family tree maker for Dummies
Raspberry Pi for Dummies	3D printing for Dummies
