

# PUBLIC MEETING

## *Harvard Gulch: Neighborhood Integration Plan*

You are invited to attend a public meeting to give input on neighborhood enhancement ideas in and around Harvard Gulch. The City and County of Denver is working to assure that neighborhood needs are considered as we develop a preferred plan for the gulch with the US Army Corp of Engineers.

Neighborhood Enhancement Ideas include:

- » *Trail Connections*
- » *Improved Access*
- » *Connections to the neighborhood*
- » *Recreation Activity Opportunities*

Your feedback will help the City focus investments and enhance the Denver Urban Waterways Restoration Study.

There will be brief updates from the US Army Corps of Engineers (USACE) on the Denver Urban Waterways Study and from Urban Drainage and Flood Control District (UDFCD) on the floodplain mapping. Results of those studies are not complete and will not be presented at the meeting. The USACE preferred plan will be presented at a public meeting in the winter of 2016/2017.
