*USDA’s Economic Research Service* has as its mission to anticipate trends and emerging issues in agriculture, food, the environment, and rural America and to conduct high-quality, objective economic research to inform and enhance public and private decision making. ERS shapes its research program and products to serve those who routinely make or influence public policy and program decisions. Key clientele include White House and USDA policy officials; the U.S. Congress; program administrators/managers; other Federal agencies; State and local government officials; and organizations, including farm and industry groups interested in public policy issues. *Farm Foundation, NFP* works as a catalyst for sound public policy by providing objective information to foster a deeper understanding of issues shaping the future for agriculture, food systems and rural regions. Since its founding in 1933, Farm Foundation has been a non-advocacy organization—it does not lobby or advocate positions. The Foundation’s action comes in bringing industry leaders together to address evolving issues that will shape the future of the industry. [www.farmfoundation.org](http://www.farmfoundation.org)
