

## Position Description

Plant Technicians are responsible for keeping production flowing, for meeting performance goals and for maintaining the high level of quality that consumers expect from our products. They do various types of work including running high speed converting and packing equipment, controlling the process from a computer terminal, performing preventive maintenance on equipment, basic electrical troubleshooting, and leading continual improvement in their area of ownership. Technicians work in a manufacturing operation that operates 7 days/week, 24 hours/day. The shift schedule is a 12 hour swing shift with occasional overtime. P&G believes its people are the most important factor for company success and creates a work environment that engages everyone 100% to give their best and work as teams to succeed.

## Products to be made at our Tabler Station Plant

Some of the brands to be made at the Tabler Station facility include Bounce fabric enhancers, Pantene, Head & Shoulders, Aussie, Herbal Essences and Vidal Sassoon shampoos and conditioners, Olay and Old Spice body wash products, and Swiffer products.
