2018 Handbook

# WELCOME

---

Greetings! Welcome to the 2018 Scott Arboretum Selections Spring Plant Sale! This catalog is available on the Scott Arboretum website as a reference before and after the Sale.

We have another great collection of plants for sale this year — over 150 varieties. So dig in and browse the information in the catalog. It is filled with copious amounts of cultural and design information. You'll also find a map of the Scott Arboretum, directions to the Sale, and membership information.

Friday evening, May 18th, we will be celebrating the kick-off for the Spring Sale with our Preview Party from 5:30 pm to 7:30 pm. For more information on this great opportunity to get “first dibs” on shopping, food and refreshments, call 610-328-8025, or visit the Preview Party page of our website at <https://support.scottarboretum.org/2018-scott-arboretum-selections-spring-sale/>. Rain or shine — hope to see you at the Plant Sale.

## SCHEDULE

Friday, May 18	<b>Preview Party:</b> 5:30 pm to 7:30 pm
Saturday, May 19	<b>Member Shopping:</b> 10:00 am to noon
	<b>Public Shopping:</b> noon to 3:00 pm

# VISITING AND DIRECTIONS

---

## THE SCOTT ARBORETUM OF SWARTHMORE COLLEGE

500 College Avenue, Swarthmore, PA 19081-1397

610-328-8025

[scott@swarthmore.edu](mailto:scott@swarthmore.edu)

[www.scottarboretum.org](http://www.scottarboretum.org)

- We welcome your visits.
- Browse our website to learn more about one of the most beautiful college campuses in America.
- Subscribe to our free blog, <http://blogs.scottarboretum.org/gardenseeds/>, to make your thumb (and garden) greener.
- Enrich your knowledge through our nationally registered collections.
- Inspire your own creativity with our imaginative and ever-changing teaching gardens.
- Join us in our frequent tours that highlight seasonal interest throughout the year.
- Or simply walk our gardens to refresh your body and mind.

The Scott Arboretum is open and free every day of the year.

## DIRECTIONS TO THE SCOTT ARBORETUM SELECTIONS SPRING SALE AND ARBORETUM OFFICES

From Pennsylvania I-476, take Exit 3 Media/Swarthmore. At the bottom of the exit ramp, follow sign for Swarthmore and turn onto Baltimore Pike eastbound. Stay in the right lane on Baltimore Pike, and in less than a 1/4-mile turn right onto Route 320.

Watch carefully for the turns on Route 320. Proceed to second traffic light on Route 320; turn right onto College Avenue to reach the Arboretum offices.

The Plant Sale will be held at the Wister Center on College Avenue approximately one block from Route 320. Parking is available nearby on campus at various locations and on streets as well. A plant loading zone will be designated directly in front of the Wister Center on College Avenue.

# PLANT SALE BASICS

## Thank you for your support!

As a customer of the Scott Arboretum Selections Spring Plant Sale, you support the Scott Arboretum and we thank you. Funds raised support operational costs including public outreach and educational programming. Through plant sales, we fulfill our basic mission by getting good plants into the hands of gardeners and encouraging an interest in plants and gardening.

## REFUND POLICY

ALL SALES ARE FINAL; NO EXCHANGES OR REFUNDS.

We are not able to offer refunds or exchanges since this is a special once-a-year event. Appropriate care is necessary for living plants to thrive; some have more demanding needs than others, so spend the necessary time to learn if you can provide the right environment for the plant. We aim to help all gardeners, especially beginners, to succeed with their plants and learn how to garden successfully and grow plants. To help, we produced this comprehensive catalog outlining the cultural requirements of the plants offered. This publication is posted on our website at [www.scottarboretum.org](http://www.scottarboretum.org).

Printed copies are also available to consult during the sale, and Plant Experts are present to answer questions and guide your decisions. We also encourage you to return to use our horticultural library and consult with staff members. And don't forget, thanks to modern technology, gardening advice is a simple computer click away and available at all hours within seconds!

# SCOTT STAFF AND VOLUNTEERS

## SCOTT ARBORETUM OFFICE STAFF

John Bickel—Assistant Horticulturist  
Josh Coceano—Horticulturist  
Jody Downer—Special Projects Coordinator  
Jeff Jabco—Director of Grounds and Coordinator of Horticulture  
Julie Jenney—Education Programs Coordinator  
Sue MacQueen—Community Outreach Coordinator  
Rebecca (Becky) Robert—PR and Volunteer Programs Coordinator  
Claire Sawyers—Director  
Mary Tipping—Curator and Plant Recorder  
Jacqui West—Administrative Coordinator

*— Thank you —*

Many thanks to those volunteers who have contributed their efforts to this sale.

A special *thank you* to **Alan Kruza** and **Eve Thryum** whose unwavering support and passion for plants makes this sale possible.

## SCOTT ARBORETUM HORTICULTURAL STAFF

Dan Blanton—Gardener  
Dwight Darkow—Volunteer Coordinator/Assistant Garden Supervisor  
Steve Donnelly—Athletic Fields Crew Supervisor  
Gus (Paul) Eriksen—Gardener  
Will Evans—Gardener  
Adam Glas—Garden Supervisor  
Chuck Hinkle—Garden Supervisor  
Sandra Lopez-Cortez—Gardener  
Sheila Magee—Gardener  
Susan McGinley—Gardener  
Dale Nemec—Gardener  
Susan Quinn—Gardener  
Lars Rasmussen—Assistant Garden Supervisor/IPM Coordinator  
Paul Rule—Gardener (temp)  
Melita Schmeckpeper (Education intern)

# PLANTING CONTAINER GROWN PLANTS

Please follow these planting instructions to assure that your plants become well established. We are not able to offer replacement plants, exchanges, or refunds.

**The more attention and care you give a plant during its first year, the better off it will be in the long run.**

Many containerized plants are grown in potting mixes that contain little or no actual soil. In order for a plant to make the transition from its pot into the garden, use the following guidelines:

1. Container plants are often pot bound. Slash or break up the plant's root mass and straighten out any circling or girdling roots. Remove any dead or injured roots. Place the plant in the planting hole and spread chunks of the root system over a cone of soil.
2. When planting, make sure the crown of herbaceous plants or the root flare of woody plants is level with the soil's surface when placed into the planting hole. Anticipate the soil will settle a bit — many horticulturists believe it is better to plant slightly high.
3. Mulch. Use a 2" layer of hardwood bark mulch or composted leaves around your plant, but don't pile it onto the crown or trunk. Mulch retains moisture, mediates soil temperatures, discourages weeds, and eventually breaks down into organic matter.
4. Water well after planting and continue to water frequently throughout the first complete growing season. A rule of thumb is "water once a day for a week, every week for a month, and every month for a year." Watch your plants for signs of stress and water them during periods when there is no rainfall. It is important to water conifers and broadleaved evergreens through the winter as their needles and leaves continue to lose moisture during that time.
5. Water deeply with a slow trickle for a length of time appropriate to the size of the root mass. If you just sprinkle the surface, the roots will remain shallow and grow towards the surface, making them more prone to drying out during drought.

## PLANTING STRATEGIES DURING DROUGHT CONDITIONS

During drought periods, it may be preferable to refrain from installing plants until weather conditions improve. Use these guidelines to "hold" plants until then:

1. If possible, keep plants in containers until *in situ* soil moisture is restored.
2. While plants are in containers, check them at least once a day for moisture requirements.
3. Water container plants frequently and deeply, making sure the soil is saturated. Even if the water runs out of the bottom of the pot, don't assume it's saturated. Sometimes when soil really dries out, it actually repels water at first.

If it is necessary to install plants during drought conditions, follow these guidelines:

1. Pre-moisten the soil 24 hours before you plant.
2. Once installed, check plants daily for their water needs; new plantings may require watering daily for the first few weeks.
3. Water the entire area, not just individual plants.

# SCOTT ASSOCIATE MEMBERSHIP BENEFITS

Join the Scott Associates before or at the **2018 Scott Arboretum Selections Spring Plant Sale** as a first-time member, and receive a free dividend plant. All members receive the following benefits:

- Scott quarterly newsletter, the *Hybrid*
- Two plant dividends each year
- Free seasonal walks at the Arboretum
- Free ticket(s) to Garden Day—a tour of regional private gardens
- Members early shopping at the Plant Sale
- Discounts on educational courses
- Discounts at local businesses
- Borrowing privileges in our library

See [www.scottarboretum.org](http://www.scottarboretum.org) for a full outline of membership benefits.

The Scott Arboretum is a garden of suggestions. Situated on the Swarthmore College campus, and described as “one of the most beautiful campuses in America”, the Arboretum creates the college landscape and provides a display of the best ornamental plants recommended for Delaware Valley gardens. Over 4,000 different kinds of plants are grown on the campus. All are selected for their outstanding ornamental qualities, ease of maintenance, and resistance to disease.

Major collections include flowering cherries, *Corylopsis*, lilacs, magnolias, native azaleas, hollies, tree peonies, rhododendrons, and witchhazels. Other special gardens include the Rose Garden, Fragrance Garden, Winter Garden, Isabelle Cosby Courtyard, Nason Garden, Biostream, Harry Wood Courtyard Garden, Metasequoia Allée, Pollinator Garden, and the display gardens surrounding the Arboretum Offices.

In 2018, the Scott Arboretum was awarded Level III accreditation by the ArbNet Arboretum Accreditation Program and the Morton Arboretum for achieving standards of professional practices deemed important for arboreta and botanical gardens.

# SCOTT MEMBERSHIP APPLICATION

If you have questions regarding joining the Scott Associates, please contact the Arboretum Offices at 610-328-8025, or email us at [scott@swarthmore.edu](mailto:scott@swarthmore.edu).

Your support of the Scott Arboretum is greatly appreciated.

Please print your name as you wish it to appear in our records.

If your company matches membership gifts, please submit a matching gift form.

## Additional Contribution

I would like to make an additional contribution of \$ \_\_\_\_\_ to the Scott Arboretum.

# THE MEANING OF OUR LABELS\*

## Unusual Annuals / Tropicals

All annuals and tropicals are identified with yellow labels.

Annuals are plants that live one year or a single growing season. The annuals we are offering typically provide long foliage or blooming interest, presenting unique opportunities to add dramatic interest to gardens. Some annuals can be perpetuated by collecting seed.

Tropical plants come from the tropical regions of the globe and will not withstand freezing temperatures. These plants, while they can add distinct foliage and flowers to the summer gardens, must be overwintered indoors. In some cases this may mean growing them as houseplants. In other cases, such as with cannas, the plant can be overwintered by digging up and storing the rhizome. Please read the cultural notes with each plant description to learn how to treat those plants that overwinter easily indoors.

## Hardy Plants

All hardy plants are identified with green labels.

Hardy plants survive in our climate zone, USDA zones 6-7. This sale offers two woody types: camellias and deciduous azaleas, as well as an array of hardy perennials that are generally best planted in spring. They will persist in your garden year after year with proper siting and care. Again, please read the cultural notes associated with each plant listing to learn about specific care for these hardy plants.

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<b>Abutilon megapotamicum 'Variegatum'</b>	Variegated Chinese Lantern	Annual	Non-native	2 - 3'	4 - 5'	Part shade to full sun	Evenly moist, well-drained soil	Dangling bright yellow flowers suspended from fiery red calyxes; gold and green leaves.	Baskets, standards, planters.	\$ 7.50
	<b>Abutilon pictum 'Thompsonii'</b>	Thompson's Flowering Maple	Annual	Non-native	2 - 3'	3 - 4'	Part shade to full sun	Evenly moist, well-drained soil	Bell-shaped, salmon-orange flowers; gold and green leaves.	Baskets, standards.	\$ 7.50
	<b>Acalypha wilkesiana 'Miltoniana'</b>	Copperleaf	Annual	Non-native	2 - 3'	2 - 3'	Morning sun to light shade	Evenly moist, well-drained soil	Leaves mottled in hues of red, bronze, coral-pink, green, and gold.	Accent in borders; single specimen in containers.	\$ 7.50
	<b>Acmella oleracea</b>	Peek-a-Boo Spilanthes	Annual	Non-native	12 - 14"	12"	Full sun to partial shade	Moist, well-drained, average soil	Gumdrop-shaped yellow flowers with red centers bloom repeatedly until fall. The handsome, dark green foliage is reminiscent of hibiscus foliage.	Also known as toothache plant, spiranol from the flowers and leaves is used worldwide as an analgesic for tooth pain.	\$ 2.25
	<b>Aconitum fischeri</b>	Azure Monkshood	Perennial	Non-native	1.5 - 2'	1 - 1.5'	Sun to partial shade	Evenly moist, well-drained soil	Upright spikes of lavender-blue flowers from late summer to early fall.	Vertical accent in perennial borders	\$ 22.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<i>Adonis amurensis</i>	Amur Adonis	Perennial	Non-native	6 - 8"	6 - 8"	Part sun to shade	Well-drained, moist, loamy soil	Dark green, fern-like foliage is topped by brilliant, golden yellow, buttercup-like flowers in early spring.	For the rock garden, front of the border, or special niche -- expect it to go dormant by late spring.	\$ 18.00
	<i>Agapanthus 'Blue Yonder'</i>	Hardy Lily of the Nile	Perennial	Non-native	2 - 3'	2 - 3'	Full sun	Evenly moist, well-drained soil	Clusters of cobalt-blue, starlike flowers rise above green foliage in summer. Stated as hardy in Zones 5-10.	Borders, containers, and cutting garden.	\$ 11.50
	<i>Agastache 'Kudos Mandarin'</i>	Dwarf Hummingbird Mint	Perennial	Non-native	1.5 - 2'	1.5'	Full sun	Needs excellent drainage, particularly in winter.	Cheery, bright-orange plumes bloom all summer into fall.	Borders and containers; attracts honeybees, butterflies, and hummingbirds.	\$ 17.00
	<i>Agave victoria-reginae 'Porcupine'</i>	Queen Victoria Century Plant	Tropical	Non-native	1.5 - 3'	1.5'	Full sun	Dry, well-drained	Perfectly symmetrical and slow growing. Clump-forming with tapered green leaves marked in white lines. Artichoke-like appearance.	Containers; summer out in dry gardens; overwinter on sunny windowsill.	\$ 11.50
	<i>Allium 'Millenium'</i>	Ornamental Flowering Onion	Perennial	Non-native	1.5'	1'	Full sun	Dry to medium, well-drained soil	2018 Perennial Plant of the Year. 2-inch-wide, globe-shaped, rosy-purple flower heads appear in summer.	Vertical accent in perennial borders.	\$ 17.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<i>Alocasia sarawakensis 'Yucatan Princess'</i>	Elephant Ear	Annual	Non-native	6'	6'	Shade to part sun	Rich, moist, well-drained soil	Glossy, dark green foliage with maroon undersides and stem.	Mixed container centerpiece, specimen container, perennial border.	\$ 10.00
	<i>Alocasia 'Sarian'</i>	Elephant Ear	Annual	Non-native	2-3'	2'	Shade to part sun	Rich, moist, well-drained soil	Large arrowhead-shaped leaves with creamy white veins; stems are striped.	Mixed container centerpiece, specimen container, perennial border	\$ 30.00
	<i>Alternanthera 'Red Thread'</i>	Joseph's Coat	Annual	Non-native	1'	2'	Part sun to part shade	Water when soil is dry to the touch	Deep burgundy foliage with a thread-like texture.	Use as a textural contrast to bold foliaged plants in the perennial border or in containers.	\$ 6.50
	<i>Alternanthera 'True Yellow'</i>	Joseph's Coat	Annual	Non-native	0.5 - 1'	0.5 - 1'	Full sun	Water when soil is dry to the touch	Bright chartreuse-yellow foliage.	Colorful contrast to green and maroon foliaged plants -- in containers or the perennial border.	\$ 6.50
	<i>Amsonia tabernaemontana 'Short Stack'</i>	Dwarf Blue Star	Perennial	Native	0.75 - 1'	1 - 1.5'	Part sun to part shade	Moist, well drained soil	Dwarf in habit with sky-blue flowers in midspring.	Plant along woodland edges, in shady native gardens, or in containers.	\$ 17.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<i>Anemonopsis macrophylla</i>	False Anemone	Perennial	Non-native	2 - 3'	1 - 2'	Shade to part shade	Well-drained, moist, loamy soil	Bears large, waxy, pendant flowers in August. Foliage similar to anemone and the flowers like those of columbines but without the spurs.	Site in shady, cool and moist, woodland conditions or along shaded paths and walkways.	\$ 22.00
	<i>Angelonia 'Anzwei'</i>	Angelface® Blue Summer Snapdragon	Annual	Non-native	20 - 24"	12 - 14"	Full sun	Well-drained, average soil.	Rich violet-blue snapdragon-like flowers with spotted throats make this jewel a delightful stunner in the garden. Deheading is not necessary, but by doing so will encourage abundant re-flowering.	Best used with richly colored companion plants and as a filler for holes in around perennials and shrubs. A wonderful addition for window boxes and planters too.	\$ 5.00
	<i>Anisodontea 'Elegant Lady'</i>	Cape Mallow	Annual	Non-native	2 - 5'	1 - 3'	Full sun	Well-drained soil	Small, pink, hibiscus-like flowers bloom all summer.	Site in borders or grow in large containers.	\$ 7.50
	<i>Antirrhinum hispanicum</i>	Spanish Snapdragon	Perennial	Non-native	1'	2'	Full sun	Well-drained soil	Pink/yellow flowers bloom all summer; thrives in heat and humidity	Rock garden, atop a wall, along a path or in a container	\$ 10.00
	<i>Antirrhinum majus 'Orange Flame'</i>	Snapdragon	Annual	Non-native	14-16"	12-14"	Full sun - partial shade	Moist, well-drained, average soil	Bicolored orange flowers with yellow throats. Improved breeding allows for earlier flowering, increased heat resistance, and color uniformity.	Excellent for massing, borders, planters, and cut flowers. Great as a companion plant for annuals like Zinnia or Tagetes, or perennials such as Heuchera 'Caramel' or Coreopsis spp.	\$ 2.25

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<b><i>Aquilegia canadensis</i></b>	Columbine	Perennial	Native	2 - 3'	1 - 1.5'	Full sun to partial shade	Rich, moist, well-drained soil	Red/yellow flowers in spring; foliage interest all season.	Attractive to hummingbirds. Site in open woodlands, cottage or native gardens.	\$ 14.00
	<b><i>Argyreia nervosa</i></b>	Wooly Morning Glory	Annual	Non-native	25'+	3'+	Full sun to partial shade	Rich, moist, well-drained soil	Large, ornamental, fuzzy, white leaves give extraordinary texture to the garden	Needs a strong support -- tree, arbor, tall post, or keep trimmed to a mound-like form.	\$ 32.00
	<b><i>Asarum maximum 'Ling Ling'</i></b>	Panda Face Ginger	Perennial	Non-native	0.5'	1'	Shade	Moist, well drained soil	Glossy, rich green, heart-shaped foliage highlighted by two silvery-green blotches on either side of the central stripe.	Up front in the shade garden, along a shady walkway, or in a container on a shady patio.	\$ 10.00
	<b><i>Athyrium ceterach</i></b>	Eared Lady Fern	Perennial - Fern	Non-native	1 - 1.5'	1 - 1.5'	Part to full shade	Moist, well-drained soil	Erect, triangular, dusky green fronds with dark burgundy stems.	Shade or woodland gardens.	\$ 16.00
	<b><i>Begonia 'Golden Glow'</i></b>	Rhizomatous Begonia	Tropical	Non-native	6 - 12"	6 - 12"	Bright, indirect light	Water when soil is dry to the touch	Bright lime-yellow foliage with light pink flowers spikes in late winter.	Containers; hanging baskets; overwinter as a houseplant.	\$ 10.50

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<b>Begonia 'Harmony's Fire Woman'</b>	Rex Begonia	Tropical	Non-native	Up to 24"	Up to 18"	Bright, indirect light	Water when soil is dry to the touch	Silvery gray, pink, and purple leaves that are slightly ruffled.	Containers; hanging baskets; overwinter as a houseplant	\$ 10.50
	<b>Bletilla Yokohama gx 'Kate'</b>	Hardy Ground Orchid	Perennial	Non-native	to 3'	to 3'	Morning sun to partial shade	Moist, well-drained rich soil	Upright, sword-like, pleated, green leaves topped with medium-lavender flowers effective for 2 months.	Perennial borders, along woodland edges, containers, makes a long-lasting cutflower.	\$ 10.00
	<b>Brillantaisia ulugurica</b>	Giant Salvia	Annual	Non-native	4 - 7'	3 - 5'	Full sun	Moist, well-drained rich soil	A salvia on steroids -- giant purple, salvia-like flowers bloom from early summer to frost. Large textural leaves.	Perennial borders or containers -- be sure to stake to secure through high winds and heavy rains.	\$ 9.00
	<b>Brugmansia x candida (White)</b>	Angel's Trumpet	Annual	Non-native	5 - 10'	3 - 5'	Full sun to partial shade	Plenty of water; fertilize heavily	White, 15" long, fluted bells that perfume the air on warm evenings.	Containers; focal point in a sunny garden with moist, well-drained soil -- lift in fall.	\$ 32.00
	<b>Bulbine frutescens 'Hallmark'</b>	Orange Bulbine	Annual	Non-native	1-2'	2 - 3'	Full sun to partial shade	Dry, well-drained soil	Orange flowers with frilly yellow stamens rise above narrow, fleshy leaves.	Along walkways, in raised planters, or combine with other succulents.	\$ 9.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<i>Calamintha nepeta</i> ssp. <i>nepeta</i>	Calamint	Perennial	Non-native	1 - 1.5'	1 - 2'	Full sun	Well-drained soil	Tiny, tubular, two-lipped lavender-to-white flowers bloom June to Sept.	Edging to walks, spilling over walls, rock gardens, containers.	\$ 16.00
	<i>Callisia fragrans</i> 'Melnikoff'	Basket Plant	Tropical	Non-native	to 1'	3'	Partial shade	Moist, well-drained soil	Rosettes of bright green, waxy leaves with creamy-white, longitudinal stripes. Panicles of clustered white flowers.	Groundcover, hanging baskets, spilling over mixed containers	\$ 9.50
	<i>Canna</i> 'Black Knight'	Canna	Annual	Non-native	4 - 5'	2'	Full sun	Rich, moist soil	Deep reddish-black foliage and stunning fire engine-red flowers.	Containers; accent in garden border, in water gardens. Deer resistant; attracts hummingbirds.	\$ 15.00
	<i>Canna</i> 'Grande'	Canna	Annual	Non-native	to 10'	2'	Full sun	Rich, moist soil	Grow for its maroon-edged bold green foliage -- also maroon midribs and stems. Appears more like a banana than a canna. Small red species-type flowers.	Water gardens, sunny perennial gardens, containers, deer resistant, attracts hummingbirds.	\$ 15.00
	<i>Canna</i> 'Orange Punch'	Canna	Annual	Non-native	4'	to 2'	Full sun	Rich, moist soil	Short and compact. Intense bright orange flowers displayed in pendent racemes instead of upright spikes.	Water gardens, sunny perennial gardens; containers. Deer resistant, attracts hummingbirds.	\$ 15.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<b>Carex siderostica 'White Center'</b>	Broad-leaf Sedge	Perennial	Non-native	1'	1 - 1.5'	Shade to partial shade	Moist to average soil with good drainage	Green and white variegated leaf, white in center fading to pale-green as season progresses; deer resistant.	Ground cover, pathway edges, front of shady perennial border.	\$ 18.00
	<b>Celosia argentea (Spicata Group) 'Flamingo Feather'</b>	Cockscomb	Annual	Non-native	2 - 2.5'	1'	Full sun	Moist, well-drained, regular soil	Rose-pink flowers shaded silver at the base.	Mass, in borders, or as a cut or dried flower.	\$ 2.25
	<b>Celosia argentea var. cristata (Cristata Group) 'Dracula'</b>	Cockscomb	Annual	Non-native	8 - 16"	8 - 12"	Full sun	Well-drained, loamy soil.	A novelty cockscomb with a large, velvety, ruby-red flower and purple-green foliage. Foliage color is best in full sun.	A stunner when planted with silver foliage plants. Flowers can be harvested for fresh-cut use or dried for long-lasting arrangements.	\$ 6.50
	<b>Cestrum 'Orange Peel'</b>	Night-blooming Jasmine	Tropical	Non-native	3 - 5'	3 - 5'	Full sun	Moist, well-drained soil	Sweetly scented (at sunset into evening), orange flowers are displayed in terminal clusters.	Site near or on a terrace or patio to enjoy its highly scented blossoms. Deer resistant; attracts hummingbirds and butterflies.	\$ 13.00
	<b>Clematis 'Betty Corning'</b>	Clematis	Vine - Hardy	Non-native	4 - 8'	2 - 4'	Full sun to part shade	Medium moisture, well-drained, fertile soil	Single, nodding, bell-shaped, lilac-blue, 2" flowers bloom from early summer into fall.	Train to grow on a trellis, wall, over a shrub, up a lamp post, or other support. Or use as a scrambling groundcover providing no support.	\$ 30.00

Image	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<b>Clematis 'Mrs. Robert Brydon'</b>	Bush Clematis	Vine - Hardy	Non-native	6 - 8'	4'	Full sun	Moist, well-drained soil	Small 1" blue-white starry flowers occur in clusters at stem ends from late summer into fall.	Non-twining. Allow to grow naturally into a mounding shrub up to 3' high and twice as wide. However, can be trained to climb a trellis, fence, or other stationary structure by ties or clips. Cut back to ground in spring.	\$ 30.00
	<b>Clematis 'Rooguchi'</b>	Clematis	Vine - Hardy	Non-native	6 - 8'	3 - 4'	Full sun to partial shade	Medium moisture, well-drained, fertile soil	Leathery, solitary, nodding, indigo-plum-purple bell-shaped flowers (to 2 1/2" long) bloom from early summer to frost. Silvery seed heads follow.	Non-twining vine. Can be trained to climb a wall, trellis, fence, arbor, porch, lamppost or other stationary structure by ties or clips. Cut back to ground in spring.	\$ 30.00
	<b>Clematis tibetana</b>	Clematis	Vine - Hardy	Non-native	18 - 25'	4 - 8'	Full sun to partial shade	Moist, well-drained fertile soil	2" lantern shaped flowers in late summer into fall. Attractive bluish-green foliage accentuates the flowers.	Train to grow on a trellis, wall, over a shrub, up a lamppost, or other support. Or use as a scrambling groundcover providing no support.	\$ 30.00
	<b>Colocasia 'Black Coral'</b>	Elephant Ear	Annual	Non-native	3 - 4'	3 - 4'	Full sun to bright part shade	Moist to boggy fertile soil	Glossy, jet black, puckered, arrow-shaped, 1 to 2-foot-long leaves with deep blue veins; jet black stems.	Plant in the ground, in large containers, or site in a pond.	\$ 15.00
	<b>Colocasia fontanesii</b>	Elephant Ear	Annual	Non-native	4 - 7'	4'	Full shade to bright partial shade	Moist to boggy fertile soil	Giant 3-foot-long, deep olive-green leaves sit atop long purplish-black stems.	Plant in the ground, in large containers, or site in a pond.	\$ 15.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<i>Coprosma 'Rainbow Surprise'</i>	Mirror Plant	Tropical	Non-native	1.5 - 2'	1.5 - 2'	Full sun to light shade	Average moisture in well-drained soil	Green and cream shiny, mirror-like leaves are tinged with gold and hot pinks during the heat of summer.	Use in containers or in garden borders and rock gardens. Can be pruned and clipped into hedges and topiary.	\$ 7.50
	<i>Corydalis cheilanthifolia</i>	Fern-leaf Corydalis	Perennial	Non-native	9 - 12"	9 - 12"	Full sun to partial shade	Needs good drainage in a humsy moist, acidic soil.	Bright yellow, tubular flowers appear just above the mounded foliage in late spring into early summer. With its blue-green foliage resembling ferny fronds, this species of corydalis remains decorative throughout the season.	Grow in rock walls or between the stepping stones on a well-drained path. A choice selection for a dappled mixed border or open woodland. Self-seeds.	\$ 11.00
	<i>Crocosmia 'Distant Planet'</i>	Montbretia	Perennial	Non-native	2.5'	1.5'	Full sun to light shade	Average moisture in well-drained soil	Flared flowers in bright to scarlet orange bloom in late spring into summer. Swordlike leaves.	Site in the herbaceous border. It is drought tolerant.	\$ 20.00
	<i>Cunila origanoides</i>	Dittany	Perennial	Native	0.75 - 1'	0.75 - 1'	Full sun to partial shade	Well-drained soil; drought tolerant	Clusters of two-lipped, lavender flowers bloom from mid-summer into fall.	Herb garden, border front, rock garden, or naturalized native plant garden.	\$ 20.00
	<i>Cyperus papyrus (Dwarf Form)</i>	Dwarf Egyptian Papyrus	Tropical	Non-native	2 - 3'	1 - 2'	Full sun to bright shade	Moist to wet soil	Clumps of green, upright stems, topped with small, thread-like clusters, add vertical appeal to the garden.	For the smaller container, bog, or pond.	\$ 7.50

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	Cyperus papyrus King Tut®	Egyptian Papyrus	Tropical	Non-native	4 - 6'	3 - 4'	Full sun to bright shade	Moist to wet soil	Bold, vertical appeal forming grass-like clumps of green triangular stems topped with a dense cluster of 4 to 10-inch bright green, threadlike stems.	Borders, bogs, and water gardens. Perfect for containers without drainage holes.	\$ 20.00
	Cystopteris fragilis	Fragile Fern	Perennial	Native	5 - 10"	5 - 10"	Partial to full shade	Lean, rocky soil, that is kept consistently moist, prefers limed soil; goes dormant in dry sites but recovers well	Erect, frilly, bright green, arching fronds. Each frond is divided into 8-12 pairs of leaflets, each of which is subdivided into lobed segments. Habit is clumping and irregular and the stem is brittle near its base.	A beautiful, well-behaved delicate fern, well suited for shaded rock gardens and growing through stone walls. Underutilized, but well worth special attention.	\$ 7.50
	Dahlia 'Dreamcatcher'	Dahlia	Tropical	Non-native	4'	2'	Full sun	Well-drained, acidic soil	6" blooms are a blend of rose, peach, and soft yellow. Upright grower and good cut flower.	Containers on the deck or patio, or as a colorful accent in the garden border.	\$ 12.00
	Dahlia 'Foxy Lady'	Dahlia	Tropical	Non-native	3 - 4'	2'	Full sun	Well-drained, acidic soil	The unusual color of this 3 1/2" bloom is a dusty rose with cream/yellow highlights and a deeper rose-mauve reverse on the back of the petals.	Containers on the deck or patio, or as a colorful accent in the garden border.	\$ 12.00
	Dahlia 'Hollyhill Miss Scarlet'	Dahlia	Tropical	Non-native	3 - 4'	2'	Full sun	Well-drained, acidic soil	Deep scarlet red, 4 to 6-inch diameter flowers are laciniated (petals split at the tip) to give a fringed effect.	Containers on the deck or patio, or as a colorful accent in the garden border.	\$ 12.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	Dahlia 'Moray Susan'	Dahlia	Tropical	Non-native	5 - 5.5 '	2 - 3 '	Full sun	Well-drained, acidic soil	A complex mix of peach, pink, bronze, and butter yellow. Small waterlily type with double, 4 to 6-inch-wide blooms.	Containers on the deck or patio, or as a colorful accent in the garden border.	\$ 12.00
	Dahlia 'Touché'	Dahlia	Tropical	Non-native	3.5'	2'	Full sun	Well-drained, acidic soil	4" blossoms are an unusual shading of salmon with a bit of lavender blush on back of the petals, producing a unique and lovely color. Early bloomer.	Containers on the deck or patio, or as a colorful accent in the herbaceous border	\$ 12.00
	Dahlia 'Wildwood Marie'	Dahlia	Tropical	Non-native	4 '	3 - 5 '	Full sun	Well-drained, acidic soil	Coral pink waterlily type, 4 to 6" in diameter, displays a bushy habit.	Containers on the deck or patio, or as a colorful accent in the perennial bed.	\$ 12.00
	Dicentra cucullaria	Dutchman's Breeches	Perennial	Native	0.5 - 1'	0.5 - 1'	Partial shade to full shade	Moist, well-drained, fertile soil	Racemes of waxy, white, yellow-tipped flowers shaped like pantaloons. Ferny greyish green foliage.	Best naturalized in woodland, wildflower, or native plant gardens. Goes dormant by early summer.	\$ 13.00
	Disporum flavum	Fairybells	Perennial	Native	2 - 2.5'	0.75 - 1'	Partial shade to full shade	Moist, well-drained, fertile soil	Drooping, tubular, soft yellow flowers (usually 1-3) appear in small clusters at the stem ends in April.	Woodland or shade gardens.	\$ 22.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<b>Dodecatheon meadia</b>	Shooting Star	Perennial	Native	0.75 - 1.5'	0.75 to 1'	Part shade	Well-drained, moist, loamy soil	Each nodding white flower has five swept-back (reflexed) petals and a cluster of yellow stamens converging to a point - giving the flower the appearance of a shooting star. Flowers occur in umbels of 8 to 20 flowers in May.	Combines well with woodland, spring perennials -- ferns, Solomon's seal, rodgersias, trilliums, and epimediums.	\$ 7.50
	<b>Dracocephalum ruyschiana</b>	Northern Dragonhead	Perennial	Non-native	0.5 - 1.0'	1.0 - 1.5'	Full sun to part shade	Moist, well-drained, fertile soil	Two-lipped, strongly-fragrant, hooded, blue flowers (to 1" long) bloom in summer.	In rock gardens and in front of the perennial border. Effective when planted en masse.	\$ 11.00
	<b>Dryopteris cristata</b>	Crested Wood Fern	Perennial - Fern	Native	1 - 3'	1 - 2'	Part to full shade	Moist, well-drained soil	Very narrow, stiffly erect fertile fronds with the pinnae turned at right angles to the plane of the fronds; the sterile fronds are shorter, broader, and less erect.	Shade or woodland gardens.	\$ 16.00
	<b>Dryopteris goldiana</b>	Goldie's Wood Fern	Perennial - Fern	Native	3 - 4'	3 - 4'	Part shade to full shade	Thrives in moist soils	Makes an attractive stand of broad, arching fronds. The fiddleheads with shaggy, brownish scales are a spring highlight.	Shade or woodland gardens.	\$ 16.00
	<b>Dryopteris x australis</b>	Dixie Wood Fern	Perennial - Fern	Native	4 - 5'	2 - 3'	Part to full shade	Moist, well-drained soil	Lustrous, dark green fronds are semi-evergreen, erect, slender, and arching. A naturally occurring hybrid.	Woodland or shade gardens. Shady parts of borders and along shady building foundations.	\$ 17.50

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<i>Echinacea paradoxa</i>	Yellow Coneflower	Perennial	Native	2 - 3'	1 - 1.5'	Full sun	Dry to medium, well-drained soil	Large, daisy-like flowers with drooping yellow to orange-yellow petals and very large, coppery-brown to chocolate-brown central cones. Bloom in mid-June to mid-July and sporadically thereafter.	Mass in the border, native plant garden, naturalized area, prairie or wildflower meadow. Contrasts well with the related purple coneflowers. The paradox of this plant is that it is a "yellow" purple coneflower.	\$ 7.00
	<i>Epimedium 'Pink Champagne'</i>	Barrenwort	Perennial	Non-native	1.5 - 2'	2 - 3'	Part shade to full shade	Average moisture in well-drained soil	15-inch floral spikes carry large white spurs attached to a raspberry cup in April. Long tapered, evergreen leaves are heavily speckled with large, dark purple blotches.	Grows well under trees. Use as a ground cover or edger for shady areas. Mass in woodland gardens, wild gardens, or naturalized areas.	\$ 25.00
	<i>Eryngium planum 'Blue Glitter'</i>	Sea Holly	Perennial	Non-native	2 - 3'	1 - 1.5'	Full sun	Low moisture in dry, sandy well-drained soils	Glittering steel blue, thistle-like flowers arise from a rosette of dark green basal leaves throughout the summer.	For sun-baked areas of the landscape. Beds and borders. Effective as a single specimen or in groupings. Excellent for cut or dried flower arrangements.	\$ 18.50
	<i>Eryngium yuccifolium</i>	Rattlesnake Master	Perennial	Native	4 - 5'	2 - 3'	Full sun	Low moisture in dry, sandy, well-drained soils	Globular, 1" wide flower heads packed with tiny white flowers. Appear in branched clusters atop stems that rise 3-4' above rosettes of bristly-edged, sword-shaped, green leaves resembling those of yucca.	For sun-baked areas of the landscape. Native plant gardens, naturalized areas or prairies. Also can be effective in borders.	\$ 18.00
	<i>Euphorbia</i> [Blackbird™] 'Nothowlee'	Spurge	Perennial	Non-native	1.5 - 2'	1.5 - 2'	Full sun for best color	Low moisture in well-drained soil	Dark, velvety foliage and yellowish green bracts. The latex sap will irritate skin.	In perennial borders; especially striking in containers.	\$ 18.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<i>Euphorbia x martinii 'Ascot Rainbow'</i>	Spurge	Perennial	Non-native	20"	20"	Full sun to part shade	Average soil that is well-drained year round.	Unique variegated foliage -- narrow, grey-green leaves have a striking yellow edge. Blushes with reds and pinks in cooler weather.	Along the edge of walkway near the house to enjoy the colorful foliage in the cooler months of the year.	\$ 10.00
	<i>Farfugium japonica var. giganteum</i>	Farfugium	Perennial	Non-native	1 - 2'	1 - 2'	Part shade to full shade	Moist, well-drained soil	Known for its huge, long-stalked, glossy, leathery, kidney-shaped, dark green leaves up to 18" across.	Group in moist areas of shade or woodland gardens, borders, or along streams, ponds, pools or bog gardens.	\$ 27.00
	<i>Fothergilla x intermedia 'Blue Shadow'</i>	Fothergilla	Woody Shrub	Native	4 - 6'	4 to 6'	Full sun - partial shade	Moist, acidic, fertile, well-drained soil	Leaves are a striking powder blue throughout summer, and change to brilliant shades of red, orange, and yellow in fall.	Makes an outstanding specimen or accent shrub in borders, foundation plantings, and along woodland margins. Site with rhododendrons since they share the same growing conditions.	\$ 28.00
	<i>Gentiana scabra var. buergeri</i>	Japanese Gentian	Perennial	Non-native	0.5 - 1'	0.5 - 1'	Full sun to partial shade	Humus rich, moist, well-drained soil	An open-flowered gentian with sky blue, bell-shaped flowers that open in August through late fall.	An easy to grow plant for borders and planters -- produces a dense mat of soft green foliage	\$ 22.00
	<i>Gillenia trifoliata 'Pink Profusion'</i>	Bowman's Root	Perennial	Native	2 - 2.5'	2 - 2.5'	Afternoon shade	Humus rich, moist, well-drained soil	Pink flowers with narrow petals are held daintily above reddish leaves on deep red stems.	Plant on the woodland edge where it will bloom from April till June.	\$ 23.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<b>Gomphrena globosa 'Fireworks'</b>	Globe Amaranth	Annual	Non-native	3 - 4'	3'+	Full sun	Moist, well-drained, average soil	Rosy-pink pom-pom shaped flowers tipped in bright yellow; foliage similar in appearance to <i>Verbena bonariensis</i> .	Quintessential cottage garden plant; attracts butterflies and pollinators; can be used as fresh or dried flower.	\$ 2.25
	<b>Hakonechloa macra [SunFlare™] 'HABsf1007'</b>	Japanese Forest Grass	Perennial	Non-native	1 - 1.5'	1.5 - 2'	Full sun to partial shade	Humus rich, moist, well-drained soil	Vibrant, chartreuse to golden yellow foliage with deep crimson tips. In fall the colors turn to tones of burnt orange and burgundy-red. Cascading foliage.	Offers great textural and colorful contrast in borders and in mixed containers. Use as a ground cover or along pathway and woodland edges.	\$ 22.00
	<b>Helleborus (Rodney Davey Marbled Group) 'Penny's Pink'</b>	Hybrid Hellebore	Perennial	Non-native	1 - 2'	1 - 2'	Partial shade to full shade	Humus rich, moist, well-drained soil	Dusky pink flowers from March to April; flowers are forward-facing. In spring attractive marbled foliage emerges, flushed pink when young.	Shady borders, woodland gardens under trees or large shrubs, and containers. Very effective when sited en masse.	\$ 28.00
	<b>Hemigraphis colorata 'Exotica'</b>	Purple Waffle Plant	Annual	Non-native	1 - 1.5'	1 - 1.5'	Full sun to shade	Rich, moist, well-drained soil	Silvery grey, purple-stained, crinkled leaves with undersides a deep purplish maroon.	Hanging planters or as a groundcover at the foot of larger perennials.	\$ 7.50
	<b>Hepatica acutiloba</b>	Sharp-lobed Hepatica	Perennial	Native	4 to 6"	6 * 9"	Open shade to shade	Moist, well-drained woodland soil	Daisy-like flowers in shades of pink, white, or blue arise above ground-hugging, 3-lobed, evergreen leaves in early spring.	Allow to naturalize in a shaded woodland garden. Early season nectar source for native butterflies.	\$ 8.50

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<b>Hibiscus coccineus</b>	Scarlet Rose Mallow	Perennial	Native	3 - 6'	2 - 3'	Full sun to partial shade	Moist, well-drained soil	Features showy, hollyhock-like, 5-petaled, bright scarlet red flowers (3-5" diameter) borne in the upper leaf axils of the plant over a long bloom period (mid-summer to early fall).	For the rear of the perennial border, mixed border, or rain garden. Group in moist locations such as along the edge of a pond or stream where it is effective for erosion control. Stems are study and rarely need staking.	\$ 8.00
	<b>Hibiscus tiliaceus 'Variegatus'</b>	Tricolor Hibiscus	Annual	Non-native	Up to 8'	Up to 8'	Full sun to partial shade	Even moisture in well-drained soil	Huge, heart-shaped, tropical leaves are speckled, splashed, and striped in shades of green, cream, pink, and deep maroon. Flowers open yellow and turn orange-red through the day.	Attracts hummingbirds and butterflies. Site in a sunny border or in a container; suitable as a houseplant. Gives color year round with foliage and/or flowers.	\$ 20.00
	<b>Hosta 'Rainbow's End'</b>	Hosta	Perennial	Non-native	1'	2'	Part shade	Moist, well-drained, rich soil	Very showy and unique hosta with a bright golden streaked center surrounded by a dark green border. Slug resistant leaves are thick and shiny.	Front of a shady border, focal point in a woodland setting or grow in a container.	\$ 22.00
	<b>Humata griffithiana var. tyermannii</b>	Rabbit's Foot Fern	Tropical	Non-native	0.5 - 1'	0.5 - 1'	Full sun to partial shade	Moist, well-drained soil	A decorative fern with glossy, double pinnate dark green fronds. Older plants are even more noticeable for their white, very fuzzy rhizomes that grow over the edge of pots.	Grow in container or hanging baskets. Overwinter indoors.	\$ 7.50
	<b>Iliamna remota</b>	Kankakee Mallow	Perennial	Native	4 - 6'	2 - 3'	Full sun to partial shade	Medium moisture, well-drained soil	Bluish pink flowers with noticeable central boss of stamens. Bloom in early summer followed by pod-like fruits.	Border, naturalized garden, or wildflower garden.	\$ 22.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<b>Impatiens omeiana</b>	Hardy Impatiens	Perennial	Non-native	0.75 - 1.5'	0.75 - 1.5'	Partial shade to full shade	Moist, well-drained soil	Dark green leaves with a white strip on the midrib and yellow snapdragon-like flowers that bloom in early autumn.	Best naturalized in woodland or shade gardens.	\$ 20.00
	<b>Iresine 'Rose' (syn. Iresine 'Blazin' Rose')</b>	Bloodleaf	Annual	Non-native	30 - 36"	30 - 36"	Full sun to partial shade	Well-drained, loamy soil	Exotic-looking bronze quilted foliage with bright, cherry-red veins and hot pink stems makes this plant a knockout. New foliage is cherry-pink with no bronze coloration. This plant is truly a knockout! Give it room since it matures into a "mini-shrub".	Use as a single specimen in a sunny border or as a "thriller" in a mixed planter.	\$ 5.00
	<b>Leonotis leonurus</b>	Lion's Tail	Tropical Shrub	Non-native	3 - 6'	2 - 4'	Full sun	Well-drained, acidic soil	Tiered whorls of tubular, two-lipped, fuzzy, orange flowers appear as shaggy pompoms; fall bloom.	Nectar attracts hummingbirds, bees, and butterflies. Site in the perennial garden with fall blooming blue salvias.	\$ 7.50
	<b>Liatris microcephala</b>	Dwarf Blazing Star	Perennial	Native	1.5 to 2'	1 - 1.5'	Full sun	Lean, well-drained soil	Numerous spikes of tassel-like rosy purple flowers rise above grass-like foliage and bloom in August and September.	Perennial border fronts, cutting gardens, wild gardens, native plant gardens, or naturalized areas. Butterfly and hummingbird magnet.	\$ 17.00
	<b>Lilium formosanum</b>	Formosa Lily	Perennial	Non-native	4 - 7'	2 - 3'	Full sun to partial shade	Organically rich, medium moisture, well-drained soil	Pendant, sweetly fragrant, trumpet-shaped flowers (to 8-12" long) are pure white and bloom in late summer into fall. Followed by candelabra-shaped seed heads that decorate the garden all winter.	Showy flowers for borders, cottage gardens, or cutting gardens. May be grown in containers but plants and flowers will be somewhat smaller.	\$ 19.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<b>Liriope muscari 'Peedee Ingot'</b>	Golden Monkey Grass	Perennial	Non-native	1.5'	2.5'	Part sun to light shade	Moist, well-drained soil	A brilliant golden-leaved liriope, contrasting beautifully with its purple flower spikes.	Front of border or in containers. Brightens up dark spots in shade or for contrast against dark foliaged plants such as dark greens and purples.	\$ 7.50
	<b>Lonicera tragophylla</b>	Chinese Honeysuckle	Vine - hardy	Non-native	8 - 15'	5'	Sun to shade	Even moisture in well-drained soil	Clusters of bright orange-yellow, trumpet-shaped flowers bloom over bluish green leaves in mid to late summer; followed by red berries. Flowers are not fragrant.	Grow on a tree, wall, or trellis	\$ 28.00
	<b>Manfreda virginica</b>	American agave	Perennial	Native	3 - 6'	3 - 4'	Full sun to part shade	Medium to dry, well-drained soil	Forms a large, basal rosette of flat, soft, fleshy, sword-shaped, dark green leaves, sometimes speckled in red. In summer a tall stalk of yellow-green, tubular flowers rises from the rosette and lasts well into fall.	Good for sunny, dry areas in borders and in informal areas.	\$ 7.50
	<b>Marshallia grandiflora</b>	Monongahela Barbara's Buttons	Perennial	Native	1 - 1.5'	0.75 - 1'	Light shade	Moist, humusy, slightly acid soil	A dense rosette of glossy, deep green leaves subtends a sturdy, 1-2 ft. flowering stalk. The large, flowering heads are made up of densely packed, orchid pink tubular flowers with coordinating purple stamens, looking much like bachelor's buttons. Blooms June to July.	An interesting addition to the rock garden, perennial border, or woodland garden.	\$ 10.50
	<b>Mitostigma axillare</b>	African Gardenia	Tropical	Non-native	1 - 3'	2'	Full sun to partial sun	Well-drained soil. Water when soil feels dry to the touch	A small tree with green glossy leaves, white star-shaped flowers, bright orange fruits, and a sweetly fragrant aroma. Blooms winter into spring.	Grow in a container, summer outdoors on a partially shaded terrace and overwinter indoors in a sunny window.	\$ 9.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<b>Monarda 'Purple Rooster'</b>	Beebalm	Perennial	Native	3'	2.5'	Full sun to partial sun	Well-drained soil	Royal purple flowers bloom all summer on sturdy stems with no need to stake. Foliage is mildew-resistant.	Site in perennial borders. Attractive to bees, butterflies and hummingbirds. With both fragrant foliage and colorful flowers, Beebalm is ideal for making potpourri or herbal wreaths.	\$ 16.00
	<b>Osmunda claytoniana</b>	Interrupted Fern	Perennial - Fern	Native	2 - 4'	2 - 4'	Partial to full shade	Moist, well drained soils	Broad fronds are "interrupted" in the middle by spore-bearing pinnae (leaflets) which typically fall off in mid summer, thus giving rise to the common name.	Shade or woodland garden. Grow along shady foundation walls.	\$ 16.00
	<b>Oxalis regnellii 'Francis'</b>	Purple Shamrock	Perennial	Non-native	0.75 - 1'	1 - 1.5'	Partial sun to full shade	Moist, well-drained soil	Clumps of 3-lobed, shamrock-like, bright purple leaves are topped in fall with light lavender flowers.	Groundcover, hanging basket, or container plant.	\$ 7.00
	<b>Paeonia tenuifolia</b>	Fernleaf Peony	Perennial	Non-native	1 - 2'	0.75 - 1.5'	Full sun to part shade	Well-drained, moist, loamy soil	Crimson flowers (to 3" across) bloom in May. Attractive green foliage is deeply divided and lobed into needle-like, ferny segments.	Plant in groups or as a specimen. Best in perennial borders. Also effective as an accent or small herbaceous hedge along fences, sidewalks, driveways or walls.	\$ 40.00
	<b>Pavonia multiflora</b>	Brazilian Candles	Tropical Shrub	Non-native	2 - 4 ' when grown in a container	2'	Bright partial shade	Moist, well-drained soil	Blooms year round. Produces purplish blue, cone-shaped flowers with long stamens that emerge from bright, rosy red bracts; appears as a closed hibiscus.	Has an upright habit. Grow in a container, summering outdoors and overwintering indoors as a houseplant.	\$ 9.50

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<i>Pelargonium sidoides</i>	South African Geranium	Tender perennial	Non-native	12"	12"	Full sun	Well-drained soils	Forms a rosette of greyish green, heart-shaped leaves with a velvet texture. Clusters of distinctive dark reddish purple to almost black flowers rise above the foliage and bloom all summer.	Perfect for rock gardens, troughs and containers. An herbal used in the treatment of acute respiratory infections.	\$ 9.00
	<i>Pelargonium 'Vancouver Centennial'</i>	Geranium	Annual	Non-native	12"	12"	Full sun	Well-drained, loamy soil	This variety is part of the Stellar Geranium Series (aptly named for their star-shaped flowers and pointy, lobed leaves). Bronze foliage edged in gold/chartreuse and hot orange-red flowers create a dramatic effect. Full sun enhances foliage color.	Use with chartreuse-colored foliage plants and dark-leaf <i>Colocasia</i> to create drama in the garden.	\$ 5.00
	<i>Pennisetum glaucum 'Purple Baron'</i>	Ornamental Millet	Annual	Non-native	24 - 36"	18 - 24"	Full sun	Well-drained, average soil	Bronze-purple cylindrical "flower" spikes with purple-green foliage make this millet highly coveted by plant lovers and birds alike. Habit is more compact than the variety 'Purple Majesty'. Birds will savor the seeds when they mature in the fall.	Makes an outstanding accent in borders or striking focal point in planters.	\$ 6.50
	<i>Penstemon calycosus</i>	Long-sepal Beardtongue	Perennial	Native	2 - 3'	1 - 2'	Full sun to partial sun	Well-drained, loamy soil	Strong upright stems are topped by showy panicles of tubular, snapdragon-like lavender flowers in summer. Each floret has unique, long, narrow sepals.	Good choice for naturalized areas, cottage gardens, rain gardens, nectar gardens, and perennial borders.	\$ 16.00
	<i>Philodendron 'Prince of Orange'</i>	Philodendron	Tropical	Non-native	2 - 3'	2 - 3'	Partial shade to full shade	Water regularly to maintain evenly moist soil	Grow for its unique foliage color. New leaves open a bright copper-orange and mature to a soft green.	In containers on a brightly shaded patio. Overwinter as a houseplant.	\$ 7.50

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<b>Platycerium bifurcatum 'Netherlands'</b>	Compact Staghorn Fern	Tropical	Non-native	1.5'	1.5'	Morning sun and afternoon shade	Moist, well-drained soil	Looks like a staghorn fern with shielded base from which grow huge reindeer-like "antlers", but stays smaller and is perfect for containers.	Mount on a slab of wood, tie to a tree, plant in a hanging pot, or place in a container. Over winter indoors.	\$ 7.50
	<b>Plectranthus (Solenostemon) scutellarioides 'Inferno'</b>	Coleus	Annual	Non-native	24 - 36"	14 - 24"	Partial sun to full shade	Well-drained, average soil	One of the most consistently colored copper-orange coleus -- even in shade. Flowering is later in the season than other coleus. Heavy veining gives foliage a corduroy likeness.	Best used everywhere. Companion plants with purple flowers or foliage ramp-up the "wow" factor.	\$ 5.00
	<b>Plectranthus (Solenostemon) scutellarioides 'Gay's Delight'</b>	Coleus	Annual	Non-native	24 - 30"	15-18"	Partial sun to full shade	Well-drained, average soil.	Chartreuse foliage with merlot-colored veination. Flowers are insignificant; removing them before they open is highly recommended. Foliage will take-on a yellowish cast if grown in bright light.	A superb and sophisticated "brightener" for shady locations without being garish. Coleus are multi-purpose plants -- great used en masse, in planters or window boxes.	\$ 5.00
	<b>Plectranthus (Solenostemon) scutellarioides 'Glennis'</b>	Coleus	Annual	Non-native	24 - 30"	15 - 18"	Partial sun to full shade	Well-drained, average soil.	A beautiful selection with cranberry-colored foliage that fades to a yellow-green in the center and green margins. Brighter light will intensify the cranberry coloration. Flowers are insignificant; removing them before they open is highly recommended.	A real stunner in shady locations when combined with Xanthosoma 'Lime Zinger' or hostas.	\$ 5.00
	<b>Plectranthus (Solenostemon) scutellarioides 'Luminesce'</b>	Stained Glassworks™ Series Coleus	Annual	Non-native	20"	18"	Full sun to full shade	Well-drained, average soil	This mounding/trailing coleus features hot pink foliage with dark plum accents and green tips.	The Stained Glassworks™ series coleus were bred for their mounding habit, making them very suitable for hanging baskets.	\$ 5.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<b>Polypodium virginianum</b>	Rock Polypody	Perennial - Fern	Native	0.5 - 1'	0.5 - 1'	Partial to full shade	Moist, well-drained soil	A delightful, small, evergreen fern that grows in creeping clumps with erect to arching, leathery, deeply-cut, pinnately lobed fronds.	Mass or group in rock gardens, wild gardens, native plant gardens, or naturalized rocky woodland areas.	\$ 20.00
	<b>Portulaca grandiflora 'Double Sunset Fire'</b>	Moss Rose	Annual	Non-native	3 - 5"	10 - 15"	Full sun	Well-drained soil in dry conditions	Fully double, 1-inch wide flowers with magenta rose-like ruffled centers surrounded by bright golden yellow petals. Succulent, needle-shaped foliage.	Use in hanging baskets, strawberry jars, or site in rock gardens.	\$ 7.00
	<b>Rhixia virginica</b>	Virginia Meadow Beauty	Perennial	Native	0.5 - 1'	1 - 3'	Sun to part sun	Moist to wet, acidic soil	Deep pink petals are surrounded by long, slender, bright yellow anthers, which are curved like a sickle. Bloom in July to September -- flowers open in the morning and often drops petals by mid-day. The scarlet leaves and stem also add bright color to the garden.	For naturalized areas that are consistently moist, such as bogs, meadows, and open sandy places. A favorite of pollinators.	\$ 16.00
	<b>Rhododendron flammeum 'Nicole-O'</b>	Oconee Azalea	Woody	Native	6'	5'	Morning sun and afternoon shade, or filtered light throughout the day	Well-drained soil that is moist, loamy, and acidic	Funnel-shaped flowers in pastel shades of orange with a yellow blotch bloom in mid-April. Flowers appear in large clusters, up to 15, but are not fragrant.	Use in groups or as a specimen for shrub borders, mixed borders, open woodland gardens, native plant gardens, and open shade gardens.	\$ 30.00
	<b>Rhododendron 'My Mary'</b>	deciduous azalea	Shrub	Native	4 - 6'	3 - 5'	Partial shade	Moist, well-drained, loamy soil	Tubular, funnel-shaped flowers are bright yellow with orange tubes and occur in clusters in April-May	Mass, in groups, or as a specimen. Shrub borders, mixed borders, woodland borders and shade gardens.	\$ 45.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<b>Rhododendron prunifolium</b>	Plumleaf Azalea	Woody	Native	8 - 12'	4 - 5'	Morning sun and afternoon shade, or filtered light throughout the day	Well-drained soil that is moist, loamy, and acidic	Produces 4- to 5-flowered clusters of orange-red to red, funnel-shaped flowers with protruding, showy stamens. Distinctly shiny, dark-green foliage.	Dramatic accent for shrub borders, mixed borders, open woodland gardens, and native plant gardens. Good along ponds and streams for erosion control. Attracts hummingbirds, bees, and butterflies.	\$ 35.00
	<b>Rhododendron 'Razzberry'</b>	Deciduous Azalea	Woody	Native Hybrid	3 - 4'	3 - 4'	Morning sun and afternoon shade, or filtered light throughout the day	Well-drained soil that is moist, loamy, and acidic	Small and compact with mid-spring blooms that are raspberry red with a bright yellow throat. A cross between <i>R. flammeum</i> and <i>R. canescens</i> .	Use in groups or as a specimen for shrub borders, mixed borders, open woodland gardens, native plant gardens, and open shade gardens.	\$ 30.00
	<b>Rhododendron 'Yellow Delight'</b>	Deciduous Azalea	Woody	Native Hybrid	5 - 6'	3 - 4'	Morning sun and afternoon shade or filtered light throughout the day	Well-drained soil that is moist, loamy, and acidic	A dense, compact habit with large, fragrant, pale yellow flowers that contrast well against its bluish green foliage. Blooms mid to late spring; good fall color. A cross between <i>R. atlanticum</i> and <i>R. austrinum</i> .	Use in groups or as a specimen for shrub borders, mixed borders, open woodland gardens, native plant gardens, and open shade gardens.	\$ 40.00
	<b>Rothea myricoides 'Ugandense' (syn. Clerodendrum ugandense)</b>	Blue Butterfly Bush	Annual	Non-native	2 - 4' when grown in containers	2 - 4'	Full sun to partial shade	Moist, well-drained fertile soil	Flowers appear as butterflies in flight. Light blue and violet blooms are borne in 4 to 10-inch long panicles.	Use in the herbaceous border or in containers.	\$ 9.00
	<b>Rumex sanguineus 'Raspberry Dressing'</b>	French Sorrel	Perennial	Non-native	1'	1'	Full sun to part shade	Well-drained, moist, loamy soil	A green-leaved, red-veined plant that gets its name from the taste that is similar to raspberry vinaigrette.	A unique and striking ornamental but doubles as a tangy edible perfect as an addition to a salad or to use in a sauce. Harvest mature leaves throughout the spring, summer, and fall to add to salads.	\$ 9.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price	
		Salvia 'Amistad'	Friendship Sage	Annual	Non-native	4'	4'	Sun to part sun	Well-drained soil	Whorls of large, rich royal purple flowers emerge from dark, almost black bracts, blooming from spring through fall.	Incorporate into the perennial border, in containers, or in naturalized areas. The nectar rich flowers attract hummingbirds, bees, and butterflies.	\$ 8.00
	Salvia 'Balsaloom'	Black and Bloom Sage	Annual	Non-native	3 - 4'	3 - 4'	Full sun	Well-drained, average soil	An improved earlier blooming version of Salvia guaranitica 'Black and Blue' with larger flowers, thicker and darker stems. Tubular, dark cobalt blue flowers are hummingbird magnets. The ability of this beauty to shrug-off heat and humidity is impressive.	Mixed borders, containers; only a few plants are needed to make a stunning display.	\$ 8.00	
		Salvia glabrescens 'Shi-ho'	Japanese Woodland Salvia	Perennial	Non-native	1.5'	1.5'	Part sun to light shade	Moist, well-drained, rich soil	An October blooming, shade loving salvia. Dark green leaves are topped with short spikes of dark purple flowers that add color in early fall.	In shady borders, along woodland margins and edges of woodland paths.	\$ 15.00
		Sanguinaria canadensis f. multiplex	Double-flowered Bloodroot	Perennial	Native	0.75'	1'	Light to open shade	Well-drained, moist, loamy soil	Double white flowers are held atop unfurling, bluish green, mitt-shaped leaves. Bloom in mid-spring and dormant in summer.	Plant with small ferns, Solomon's seal, rodgersias, forget-me-nots, trilliums, cyclamen, and epimediums.	\$ 20.00
		Sedum SUNSPARKLER® 'Blue Pearl'	Stonecrop	Perennial	Non-native	6 - 8"	14 - 18"	Full sun	Low moisture, in well-drained soils	Forms a low, compact mound of succulent, plum foliage with smoky blue overtones, above which large clusters of bright pink flowers emerge in late summer through fall.	Mass plant on slopes, green roof systems, or as a groundcover. Excellent in containers or as a rock garden specimen. Flowers are attractive to bees and butterflies.	\$ 9.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<i>Sempervivum 'Jet Stream'</i>	Hen and Chicks	Perennial	Non-native	2"	6"+	Full sun to partial shade	Dry, well-draining soil	Small, compact, succulent rosettes which are evergreen and a dark purple-red edged in silvery hairs.	For containers that "breathe" well, such as terracotta, troughs. Grow in rock crevices, dry gardens, use in succulent wreaths, on roof shingles, and anywhere else that allows adequate root drainage.	\$ 9.00
	<i>Stachys 'Wesstalifa'</i>	Lilac Falls	Annual	Non-native	6 - 8"	18 - 24"	Full sun	Well-drained, loamy soil	A magical cross between Lamium and Stachys. A carpet of lavender-mauve flowers perched on top of satiny green foliage makes this charming new hybrid and non-stop bloomer perfect for many applications.	Exceptionally well-suited for hanging baskets, planters, window boxes or as a seasonal ground cover.	\$ 5.00
	<i>Syneilesis aconitifolia</i>	Shredded Umbrella Plant	Perennial	Non-native	1.5 - 3'	1.5 - 2.0'	Part shade to full shade	Rich, moist, well-drained soil	A great foliage plant with silvery cones of new growth that emerge from earth like little rockets and then expand into deeply incised, rounded leaves that appear as shredded umbrellas.	Good spreading perennial with attractive foliage for woodland gardens.	\$ 28.00
	<i>Thalictrum 'Black Stockings'</i>	Meadow Rue	Perennial	Non-native	4.0 - 6.0'	1.5 - 2.0'	Full sun to part shade	Rich, moist soil	Beautiful, lacy foliage. Produces tall clumps with near-black stems that bear huge clusters of lavender-magenta flowers May to June.	Best in perennial borders, cottage gardens, meadows, open woodland areas, or naturalized areas.	\$ 25.00
	<i>Thelypteris decursive-pinnata</i>	Japanese Beech Fern	Perennial - Fern	Non-native	1 - 2'	2'+	Partial to full shade	Moist, well-drained soil	Narrow upright, bright, light green fronds are held stiffly vertical making this fern noticeable from a distance. Appears clean and fresh all season long.	Has a vigorous habit which makes it a great groundcover!	\$ 16.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<i>Thunbergia alata</i> 'Raspberry Smoothie'	Blackeyed Susan Vine	Tropical Vine	Non-native	8'	4'	Full sun	Moist, well-drained soil	A twining vine with tubular, lavender-pink flowers with deep burgundy-purple eyes; blooms from midsummer to early autumn.	Grow in a container on the patio or in the back of a border where it can scramble through shrubs or climb a trellis.	\$ 25.50
	<i>Tricyrtis formosana</i> 'Samurai'	Toad Lily	Perennial	Non-native	1.0 - 1.5'	0.5 - 0.75'	Part shade to full shade	Moist, well-drained soil	Noted for its attractive, creamy golden-edged foliage and attractive lily-like flowers of light purple edged in dark purple with dark purple spotting and yellow throats. Blooms late summer.	Borders, woodland gardens, shade gardens or naturalized areas. Best sited in areas where it can be observed at close range because the beauty and detail of its small flowers.	\$ 7.50
	<i>Trillium luteum</i>	Yellow Wakerobin	Perennial	Native	1 - 1.5'	1 - 1.5'	Part shade to full shade	Rich, humusy, medium moisture, well-drained soil	A classic spring ephemeral bearing yellow blossoms atop a trio of rich green leaves, mottled with silver. The unusual yellow flowers have a trio of petals that rise upward and bloom in mid to late spring.	Excellent massed in a shade garden or naturalized wooded area. It mixes well with other spring wildflowers and ferns – combine yellow flowers with blue (Virginia Bluebells, Jacob's Ladder, and Wild Blue Phlox).	\$ 12.00
	<i>Uvularia grandiflora</i>	Large-flowered Bellwort	Perennial	Native	1.5 - 2'	1 - 1.5'	Part shade to full shade	Rich, humusy, medium moisture, well-drained soil	Features 1.5-inch-long, pendulous, somewhat bell-shaped, yellow flowers with six, partially twisted tepals and lance-shaped, partially twisted, bright green leaves. Plant has overall droopy appearance.	An excellent native shade plant for the woodland garden, shaded border front, wildflower garden or naturalized area. Mass plantings under shade trees or along wood margins can be effective.	\$ 8.50
	<i>Veronicastrum virginicum</i> 'Apollo'	Culver's Root	Perennial	Native	3 - 4'	2 - 3'	Full sun	Moist, well-drained soil	Dense, slender, 9" long spikes of tiny, tube-like, lavender blue flowers open in June/July atop strong, upright stems.	Tall flower spikes provide a strong accent and lofty vertical height for borders, cottage gardens or wild gardens.	\$ 22.00

	Plant Name	Common Name	Plant Type	Native / Non-native	Height	Width	Exposure	Soil / Moisture	Attributes	Uses	Price
	<i>Veronicastrum virginicum 'Fascination'</i>	Culver's Root	Perennial	Native	3 - 4'	2 - 3'	Full sun	Moist, well-drained soil	Dense, slender, 9" long spikes of tiny, tube-like, soft pink flowers open in July/August atop strong, upright stems.	Tall flower spikes provide a strong accent and lofty vertical height for borders, cottage gardens or wild gardens.	\$ 22.00
	<i>Xanthosoma 'Lime Zinger'</i>	Elephant Ear	Annual	Non-native	3 - 4'	1.5 - 3'	Bright partial shade	Moisture retentive, fertile soil	Produces huge chartreuse to lime-green, arrow-shaped leaves up to 18" long – reminiscent of elephant ears.	Grow in water, a boggy area, a well-watered perennial garden, and is exceptional in containers.	\$ 12.00
