## Learning Tour & Cocktails: Nixon Peabody Sustainable Spaces

Join us for a unique “field trip” – a tour of the newly-designed Nixon Peabody New York office which achieved LEED Gold status in April 2018.

Our tour guides will discuss how the space was architecturally and sustainably designed and how LEED Gold certification was earned.

Whether or not you are considering a renovation, this is a great experience you will not want to miss. The architect, designer, project manager and builder for Nixon Peabody’s project will be available to answer your questions and share information. Enjoy cocktails and some hors d’oeuvres immediately following the tour.
