**(888) 684-6064**

Skin cancer is the most common form of cancer in the U.S., with over one million new cases diagnosed every year. Left untreated, skin cancer can be deadly, but with early detection and intervention most are curable.

### Assessment and Consultation with an RN

Utilizing the DermaScan machine and questionnaire, an RN assesses current sun damage and identifies environmental and family history factors that predispose individuals to skin cancer.

### Includes Educational Materials and Display

HFC's Skin Cancer Awareness station provides educational materials as well as an informative and attractive display with important information so employees are well-informed.

### Information that can save a life!

As a result of participating in this screening service a young man was referred to his physician after our RN discovered an abnormal skin area using the DermaScan unit. He was later diagnosed with melanoma and the physician credited our screening with his early detection and success of treatment.

### Enhancement Option!

Enhance the Skin Cancer Awareness Station with the addition of educational information and displays on other types of cancer including:

- Breast
- Cervical
- Colon
- Lung
- Prostate

### Cost

**Skin Cancer Only:** \$725 for a 3-hour event. Typically serves 45-50 employees.

**Skin Cancer + Enhancement:** \$845 for a 3-hour event, serves 40-50 people
