

Stanford Map Maker

Did you know you could create your own Stanford maps? Good-bye pencil and paper, welcome Stanford's web-based mapmaker. With an up to date and accurate Stanford map as your base layer, you can mark it up with some nifty tools and reference multiple data sets like parking, safety, eateries or other points of interest!

You could be creating your very own custom map easily and then export to a pdf or print it out. You can even embed this dynamic map in your own website. And yes, you can share your map with others for further collaboration!

The web based tool is available at <http://lbre-apps.stanford.edu/custommaps/>

For any questions, please contact us at lbre-applications@lists.stanford.edu
