**6 P, TUESDAY, March 13th, 2018**

**Speaker: Neil Chatterjee, '15**

**CEO & Founder, Andrena**

**“Democratizing the Internet:  
Marshaling Blockchain for Wi-Fi Without ISPs”**

Imagine a world where you don't need traditional ISPs to get Internet access. It's already here, in Princeton: home Internet at a fraction of the cost. With the FCC's recent Title II/Net Neutrality repeal, Neil founded Andrena to deliver community powered Internet. Via purchase of data links to the greater Internet in bulk and employment of a community of blockchain-based wireless devices that automatically assemble, Andrena covers what's known as “the Last Mile.” Following a successful pilot with Princeton University and area businesses in 2017, Andrena is deploying its devices throughout town. In addition to the technical aspects, Neil will explain how consumers transition from a traditional ISP to a blockchain-based wireless service.
