

POYNT BOARDING FLOW

01

Merchant application is submitted along with the Poynt Addendum and either a purchase, rental, or the leasing agreement.

02

If Poynt is listed on the equipment form, Boarding builds the account as a standard stage only file.

03

Boarding places the terminal order and it's shipped through TPG who provide tracking info. The process is similar to that for Ingenico or VeriFone terminals.

04

Merchants who will be trained through Boomtown, need to schedule their training session using the link below:
https://www.goboomtown.com/screens/signup/?integrations_id=BFB95K

05

If you choose to train your merchants you will need to familiarize yourself with the product and schedule training when the merchant receives the unit.

*****Pivotal will not be doing activations directly for any Poynt merchants at this time.**
