

From Ebony's new family:

"Ebony seems completely at home here. Nera's legs are long for her body and she is extremely nimble, fast, and agile; Ebony's body is long for her legs, so I wasn't expecting the agility she displays... first it was "Yeah, she can jump onto the couch!"... next it was "She just jumped from the floor to the top of the back of the couch!" - that's 3' vertical. (And, yes, she jumped down too.) Given the heart condition and the recent surgery we are mindful about trying to keep her toned down, but I suspect she is feeling great for the first time in her life and reveling in it. She's like a kid who grew up in a small room suddenly landing in the middle of a marvelous playground in a huge outdoor field, and with a playmate. Fun to watch. And the interactions between the two dogs are excellent. They are both real loves, and seem extraordinarily similar in nature and ability."

♥We are so grateful to each and every one who supported Ebony along the way! ♥
