

UAS INTEGRATION PILOT PROGRAM

U.S. Department of Transportation
Federal Aviation Administration

Program Overview

(Copy for Media)

From the President

Evaluate
involvement of
state, local,
tribal
governments

Inform future
guidelines and
regulations

Develop and
test innovative
UAS concepts

An Integration Program

Achieve beyond line-of-sight operations

Promote innovation

Address security concerns

Balance national and local interests

Program Highlights

- Create a **partnership framework** for private sector and state / local / tribal governments to achieve broader national policy
- Foster **technological innovation** that will create high-paying **jobs**
- Advance the UAS industry by informing development of enabling regulations that permit more **complex, demand-driven** operations
- **Push the boundaries** of UAS use by expanding what is routinely authorized under the small UAS rule

Application Overview

57 Days

Proposals should cover:

- ❖ Development and testing of innovative UAS concepts
- ❖ Aggressive integration objectives
- ❖ Diverse set of operators in diverse environments
