

# Career Opportunity

## **Landsberg Orora Regional Quality Engineer – Los Angeles, California**

An exciting career opportunity currently exists in our Landsberg Orora Los Angeles Division located in Montebello, California. Reporting to the National Quality Manager you will be responsible for process improvement and problem solving capabilities as we prepare for SAP implementation while gathering all necessary cross-functional knowledge within and between departments, divisions and regions.

### **Key Responsibilities include**

- Implementing 5S Program for warehouse preparation to replace current aisle audit process
- Mapping business processes within divisions and thru regions
- Reviewing ISO business processes and supporting compliance efforts
- Mapping processes as it relates to work-cell optimization and standardized work
- Managing the corrective action process and document issues into the CAPA system
- Developing, measuring, and tracking KPI for standardized processes
- Taking the project management lead on selected cost initiatives and continual improvement items
- Performing other duties and or responsibilities as assigned

### **The right person will have:**

- College degree preferred
- Minimum two years demonstrated experience in process improvement engineering highly desirable
- Application in advanced operations of Microsoft Office
- Advanced understanding of the principles of quality assurance
- Experience working in JD Edwards and SAP ERP environments
- Demonstrated experience and application of root cause analysis; issue trending, and pareto analysis  
[Any equivalent combination of related education and/or experience may be considered]
