

It's About that Time to Talk

Over the age of 50? Don't be one of the 136,000* new cases in your age bracket. Colorectal cancer is the second leading cancer killer, but with early prevention it doesn't have to be. Trident Medical Center and Coastal Carolina Gastroenterology & Hepatology invite you to join us for either a lunch or dinner presentation on colorectal cancer prevention and treatment.

Prevent it. Treat it. Increase your chance to survive it.

Thursday, March 23 | 6:00 – 7:00 pm | Rya Kaplan, MD
Wednesday, March 29 | Noon – 1:00 pm | Robbie Taha, DO

Both events are held at Trident Medical Center Café A.
Seating is limited. A meal will be provided. Registration is required with Consult-A-Nurse.
Call (843) 797-3463 or visit www.tridoc.co/coloncancerseminar
