

Heart/Lung Scan Screening Registration

Audience: Scheduling and Patient Access Reps

Registrars will be prompted to create new Hospital Account Records (HARs) for patients having a Heart and/or Lung scan exam along with other scheduled outpatient services on the same day. For example, if a patient is having an outpatient CT **AND** a Heart Scan on the same day, two separate encounters and separate HARs are created.

Heart and Lung Scan Visit Types Examples:

CV CT HEART SCAN PLUS [10032]
CV CT HEART SCAN SCREENING [10096]
PV VASC SCREEN [10078]
CT CHEST LUNG CANCER SCREENING TMH [1050285]
CT SCR HEART SCAN PLUS (HRT SCAN) [1050242]
CT HEART SCAN SCREEN [1050243]
US HEART SCAN PLUS SCREEN [1050627]
US VASCULAR SCREENING [1050641]

Creating the HAR for Heart/Lung Scan Encounters

If you are creating a heart/lung scan and/or OP visit for the same date of service, you will be prompted to create a new hospital account (**Note:** The option to use the same HAR is no longer available)

The screenshot shows a web form titled "This Encounter". At the top, there are fields for Patient Class (Outpatient), Unit/Dept (HMH CAR *), Guarantor (Test,St* [11150]), Provider (Anne Anderso*), and Diagnosis. Below this is a section titled "Select a hospital account for this encounter". Inside this section, there is a yellow box labeled "Create New Hospital Account" which is highlighted with a red circle. This box contains a table with the following data:

Account ID - Guarantor	Relation to Patient	DOB	Address
<input checked="" type="radio"/> 11150 - TEST,STROKE	Self	10/10/1972	87766 Main St

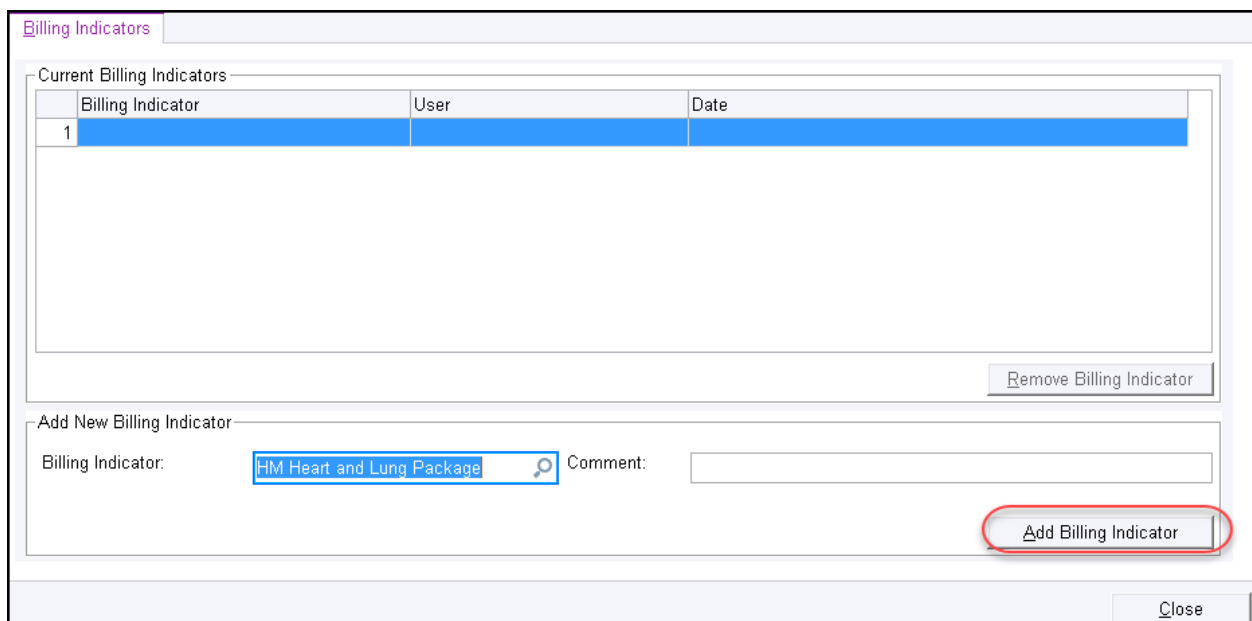

At the bottom of the form, there is an "Override" button and a "Create New Account" button, both of which are also highlighted with red circles.

Heart/Lung Scan Screening Registration

Attaching the Heart and Lung Package Billing Indicator

1. Click the green **hospital account** folder
2. Select  on the toolbar
