WEBINAR SERIES: 
Enhancing Executive Functions in the Classroom

FEATURING — TANYA KETO, Foothills Academy

K-6 TEACHERS ARE ENCOURAGED TO ATTEND.

Understanding executive functions can improve motivation, grit and overall student efficacy in classrooms. This 3-part series is designed to support teachers in understanding the role of executive functions in the classroom and how to implement ‘executive functioning friendly’ strategies in classrooms:

Webinar 1: Executive Functions: Who’s the Boss?
Tanya Keto will share the work of neurologist and teacher, Dr. Judy Willis, with a focus on brain based strategies that teachers can use to increase student engagement, motivation, and self-management. This webinar will also increase educators’ knowledge on how the student brain learns, neuroplasticity in the classroom, and how executive functions (EF) affect learning.

Webinar 2: Engaging Students From the Moment They Enter Your Classroom
All students perform better when they are engaged. Engagement is even more critical for students with executive functioning deficits. The presenter will outline why it is so important and give you SIX strategies to increase motivation and success for ALL students, including those with EF deficits.

Webinar 3: Simply Add Executive Function Strategies to Your Lesson Plans
Have you ever considered EF neural pathways when creating your lesson plans? The benefits are endless. This workshop will give you an opportunity to become a student and experience hands-on evidence based strategies. You will leave ready to integrate them into your lesson plans in any subject.

REGISTRATION NOTES
This learning opportunity is being offered through a grant from Alberta Education.

TANYA KETO
Having recently completed her Masters of Education in Child and Applied School Psychology, Tanya Keto is a Provisional Psychologist at Foothills Academy Society with a focus on assessment and intervention for students with Learning Disabilities and ADHD. She has 10 years of experience as a special needs teacher, learning strategist and guidance counselor. As a mother of a 9-year-old with unique learning needs, she is a passionate advocate for students and a collaborative resource for parents and teachers.
