

The Gordon Research Conference (GRC) on Ocean Biogeochemistry

Biogeochemistry of Marine Interfaces

welcomes marine biogeochemists from all over the World

Hong Kong, July 8-13, 2018

Campus of the Hong Kong University of Science of Technology with panoramic view of Clearwater Bay

The 2018 GRC on Ocean Biogeochemistry will focus on the latest scientific information and open exchanges on biogeochemistry of marine interfaces • Unique global networking opportunity • Maximum 200 participants

Lectures by world renowned experts and extended discussions on: Socio-Economic Aspects of Ocean Biogeochemistry • Atmosphere and Ocean • Surface and Mesopelagic Ocean • Oxygen Minimum Zones • Deep Ocean • Bottom Water and Sediment • Hydrothermal and Seafloor Systems

GRCs are fully international • Participants in the 2016 GRC were from 26 countries

The 2018 conference will be held on the beautiful modern campus of the Hong Kong University of Science and Technology •
Housing in the very comfortable University's Conference Lodge

The GRC will include interactive poster sessions on the latest scientific advances • All attendees are invited to present posters, including graduate students, postdocs, and researchers from universities, government and the private sector

Limited number of participants • Apply online *now* to ensure priority • Provide the title of your poster presentation • <http://www.grc.org/programs.aspx?id=17298>
