SketchUp

Attn: Directors Guild of Canada

SketchUp is one of the most popular 3D modeling and design tools in the world. Today, hundreds of thousands of architects, engineers, contractors, woodworkers, artists, and other creatives use SketchUp Pro, LayOut and the 3D Warehouse to design transit centers, treehouses and everything in between.

Over the years, we've also developed SketchUp Pro for film & stage professionals. As you explore SketchUp Pro, we hope you'll find that it helps you design, communicate, and plan more effectively. In particular, you may want to try:

- Working with realistic cameras and see your shots before a shoot
- Designing and documenting location-based productions
- Generating storyboards and presentation document sets
- Modeling details to clarify complex conditions
- Accessing the world's biggest repository of 3D models to speed up your design
- Assembling real-time shadow studies to understand onsite lighting conditions
- Modeling accurate interior and exterior spaces to scale

If you're just learning SketchUp Pro, we've put together some online resources to help you get going. You can visit **SketchUp.com/Learn** to access video tutorials, self-paced lessons, FAQ's and much more.

And if you're ready to jump into SketchUp Pro, we are pleased to announce a $100 discount off a single-user license, exclusive for Directors Guild of Canada members. Thanks for considering SketchUp Pro as a part of your design and planning process!

Regards,

Your friendly neighborhood SketchUp team
