

About ACP International:

ACP International was founded in 1986. From our humble beginnings in a small, single-wide trailer house to our comprehensive manufacturing facility in Arlington, we've provided services to many small and large companies. We also developed Concrete Graphics®, a specialty sign product that can withstand foot traffic. In 2009, we acquired SA-SO signs and safety, a traffic and safety company.

As a company, we've concisely grown and improved our processes. We pride ourselves in providing personalized service and listening to our customers' needs to offer them quality products made to their specifications. Many of our employees have worked for ACP for decades. In today's business world, where people change jobs often and companies facilitate layoffs, we're proud to stand against that trend. We believe our business model, our longevity in the printing industry, and our relationship with our customers have made us successful. We look forward to contributing to your success!

Security & Signs & Decals

Capabilities

At ACP, we manufacture our products in the U.S.A. This gives us the ability to prepare materials in a way that best meets your needs, meaning you save time and money when you choose ACP! We specialize in custom sign and decal products. Our digital and large format printing capabilities and diverse selection of plotters allow us to cut in various die and custom shapes - meeting just about any customer's needs.

Security Signs

ACP's security signs are comprised of either durable aluminum or plastic. Plastic signs are produced from 100% virgin styrene. Both plastic and aluminum signs can be mounted on heavy duty aluminum stakes!

Security Signs are:

- made of .024" aluminum or .060" styrene
- available in reflective or non-reflective material
- printed with long-lasting UV-stabilized inks
- our .024 aluminum signs are laminated for additional protection

Reflective material can be added to any security sign for added visibility in low light environments. Hardware and assembly are available should you need assistance in this area. ACP can produce custom dies and sizes to meet a customer's exact specifications.

Security Decals

Add window decals to your sign order for additional security awareness.

Security decals:

- are available in white vinyl or clear polyester
- come single or double-sided
- are easily customized to meet your needs

Ask your account manager about these other ACP products:

- Concrete Graphics®
- Utility Marking Products
- Traffic and Safety Products

Note: Vector artwork can be submitted to your ACP account manager for customer-designed signs and decals. ACP can also assist with original art design for a nominal fee.
